Mission Statement

The Oregon Sinus Center is committed to compassionate, state-of-the-art patient care and the advancement of clinical knowledge of rhinology, sinus and skull base surgery through research and the development of future leaders in our specialty. The Oregon Sinus Center seeks to be an international standard in clinical care, academic development, training, and research in rhinology, sinus and skull base surgery.

Core Values

Patient Care We offer a compassionate and effective approach to patient care through our expert team of professionals

Education We take a collaborative approach to training and mentoring future leaders in the specialty

Research We value the future of rhinology, sinus and skull base surgery, and this inspires internationally recognized research

Collaboration and Teamwork Our team includes a dedicated Rhinology Physician Assistant, full time Clinical Research Coordinator and Biostatistician, Medical Assistant, and clinic and surgery scheduling specialists who collaborate to set the standard for patient satisfaction.

Overview of Fellowship

This one year Fellowship provides comprehensive training in medical and surgical rhinology, sinus and skull base surgery in the setting of a tertiary academic practice. Fellows receive comprehensive surgical training in advanced techniques, including revision sinus surgery, frontal sinus surgery, orbital surgery, surgery for sinonasal malignancies and both endoscopic and open skull base surgery. Multidisciplinary surgical collaboration involving neurosurgery, oculoplastic surgery, and facial plastic surgery is emphasized. Fellows receive a faculty appointment at the instructor level and are actively engaged in all aspects of the department's teaching program, including resident education, grand rounds, and teaching in the clinic and operating room. Fellows carry an independent rhinology-specific clinic and surgical caseload with increasing autonomy as the year progresses. One-on-one mentoring is highly emphasized and mentored research, writing, and presentation are highlighted.

The primary faculty includes Drs. Smith, Detwiller, and Geltzeiler. Dr. Smith has a broad clinical practice and oversees clinical research. Dr. Detwiller has a broad clinical practice that includes the VA and she has special interest in office based rhinology and otolaryngic allergy programs which she oversees. Dr. Geltzeiler completed fellowship training in both advanced cranial base surgery and advanced head & neck oncologic surgery. He therefore focuses on that aspect of our program.

Opportunities to participate in funded clinical research and basic science/translational research programs are unparalleled and plentiful research time and resources will be provided. The Fellowship includes salary/benefit package with medical and retirement benefits.

Clinical Rotations:

The Fellowship is sub-specialty specific so that the Fellow is involved with all clinical sites where Rhinology, Sinus and Skull Base Surgery is performed.

Weekly Schedule:

The Fellow will be involved in patient care in clinic and OR with the Rhinology faculty. The Fellow will run an independent one-half day clinic, where independent surgical cases will be booked.

Research Responsibilities:

The fellow will have broad opportunity to participate in funded research programs (clinical and basic/translational), and will be encouraged to present research at national meetings. Travel and meetings are sponsored by the Department of Otolaryngology with Fellowship Director approval. Research goals are tailored to the individual Fellow's interests and goals.

Diversity of Cases:

The fellow will gain experience through a broad variety of surgical cases with an emphasis on multidisciplinary cases. Fellows will typically finish with over 350 cases. Surgical training goals are tailored to the individual Fellow's interests and goals.

Call Schedule:

Fellow will participate in mentored Faculty call with the Fellowship Director

approximately 4 weeks per year.

Additional Information:

This fellowship offers salary/benefit package with faculty-level medical and retirement benefits.

Past Sinus Fellows

Year Here	Name	Residency	Post Fellowship Position
2006 to 2007	David Poetker, MD	Medical College of Wisconsin	Professor, Medical College of Wisconsin, Division of Rhinology & Sinus Surgery, Department of Otolaryngology & Communication Services
2007 to 2008	Nathan B Sautter, MD	Cleveland Clinic Foundation, Head & Neck Institute	Assistant Professor, Oregon Sinus Center, Department of Otolaryngology/Head & Neck Surgery, Oregon Health & Science University
2008 to 2009	Ayesha Khalid, MD	Pennsylvania State University College of Medicine	Instructor, Harvard Medical School
2009 to 2010	Naveen Bhandarkar, MD	University of Illinois at Chicago	Assistant Professor, University of California, Irvine
2010 to 2011	Luke Rudmik, MD	University of Calgary, Calgary, Alberta, Canada	Associate Professor, Division of Otolaryngology – Head and Neck Surgery at the University of Calgary
2011 to 2012	John Clinger, MD	University of Iowa	Assistant Professor, Wake Forest University
2012 to 2013	Jeremiah Alt, MD, PhD	University of Florida	Assistant Professor, University of Utah
2013 to 2014	Adam DeConde, MD	University of California, Los Angeles	Assistant Professor, University of California, San Diego
2014 to 2015	Toby Steele, MD	University of California, Davis	Assistant Professor, University of California, Davis
2015 to 2016	Joshua Levy, MD	Tulane University	Assistant Professor, Emory University, Atlanta
2016 to 2017	Dan Beswick, MD	TBD	

Requirements for Appointment

Applicants must be board-eligible/board-certified and satisfy requirements for Oregon Medical Licensure.

Applicants must have strong interpersonal, verbal, and written communication skills. Applicants must also excel working as a part of a collaborative and dynamic team. Additionally, strong presentation and leadership skills are preferred.
