Check out www.cps.edu/cps if you have questions or just want more information about the CPS Project at OHSU or email us at cps@ohsu.edu.

Do you work in a school? Are you trying to use the model in your classroom and wish you had some help? Are you getting stuck and need some help troubleshooting?

Educators can now access a **Think:Kids Certified Trainer** online the fourth Tuesday of each month at 3:45pm. This time can be used to brainstorm how to address challenging situations using the CPS model, discuss strategies for intervening and troubleshoot sticking points.

The CPS Approach

The Collaborative Problem Solving® approach is an evidence-based method to managing challenging behavior that promotes the understanding that **challenging kids lack the skill - not the will - to behave**; specifically, skills related to problem-solving, flexibility and frustration tolerance.

Unlike traditional models of discipline, the CPS approach avoids the use of power, control and motivational procedures and instead focuses on collaborating with the child/ youth/ young adult to solve the problems leading to challenging behavior and building the skills they need to succeed.
