

The below text is an example of the instructions provided to learners on writing a reflection. The specific requirements for your course will vary based on a number of factors. If you have questions please contact OHSU CPD.

The ABIM requires an assessment in order to award MOC Part 2 points.

Instructions for earning MOC points for this course

You will be asked to provide a short (25 word minimum) reflection for each talk you attended. The reflection should take the form of a [clinical pearl](#) from the talk that you will take back to your practice or share with a colleague. This reflection is separate from the speaker evaluation and should refer to your learning, rather than the content or quality of the talk. The reflections will be anonymized and shared with other participants and with the speakers.

- MOC points equivalent to the CME credit available for that talk can be earned for each reflection you complete.
- Reflections are only required for talks for which you wish to earn MOC points.
- Reflections are not required in order to receive CME credit.
- The reflections will be reviewed and you will receive notification of your total points earned.
