

Student and Resident Poster Forum at the 2020 OAFP (Oregon Academy of Family Physicians) and ORPRN (Oregon Rural Practice-based Research Network) Annual Conference, April 23, 2020.

We are excited to announce that the call for abstracts for the student, resident and fellow poster forum at the 2020 OAFP/ORPRN spring meeting is now open. Students in any health discipline (medicine, public health, nursing, physician assistant, etc.) as well as primary care residents and fellows are invited to submit an abstract. Projects must be related to primary care, but can include research, quality improvement, education, workforce, etc. Both completed works and works-in-progress are acceptable.

Student and Resident Poster Forum at the 2020 OAFP (Oregon Academy of Family Physicians) and ORPRN (Oregon Rural Practice-based Research Network) Annual Conference, April 23, 2020.

Call for Poster Abstracts from students, residents and fellows:

Students, residents and fellows from around Oregon are invited to submit scholarly abstracts from research, quality improvement, education, workforce, practice facilitation or implementation projects. All subjects related to primary care are encouraged. Projects in progress, as well as completed projects are encouraged

Selected abstracts will be presented as posters during the opening reception of the OAFP/ORPRN Spring Weekend on Thursday evening, April 23, 2020. Posters will be judged by a panel of researchers, physicians and quality improvement experts. Prizes will be awarded to the top three posters, based on clarity of presentation and scholarly rigor.

Email your abstract to bbf@oafp.org by Feb 18, 2020
Selected abstracts will be notified by Mar 9, 2020

Abstract Requirements

- Limit abstract to 500 words. This does not include the title or authors.
- Type the body of the abstract as one paragraph. The abstract should be written in the third person.
- The abstract should contain the subheadings described below, as appropriate.
- The abstract should not contain charts, graphics, references, or acknowledgments.

Abstract Format

Title: Type title in bold at the top of the abstract.

Author(s): List author(s) with presenter listed first separated by semicolons.

Context/background: The abstract should begin with a sentence or two summarizing the rationale for the study or project, providing the clinical (or other) reason for the study or project. In addition, the author should give a sentence or two about the importance of this work to family medicine/primary care.

Objective: State the objective or study question addressed (eg, to determine whether...). If more than one objective is addressed, the main objective should be indicated and only key secondary objectives stated.

Methods: Include as appropriate any of the following: **design:** Describe the basic design of the study or project. Use descriptors such as randomized controlled trial, cohort, case control, survey, case series, cost-effectiveness analysis, quality improvement or qualitative study. For new analyses of existing data sets (secondary data analysis), the data set should be named and the basic study design disclosed; **Setting:** Describe the study setting(s) such as general community, a primary care or family medicine practice, hospital, nursing home or other facility, etc.; **Participants:** State the important eligibility (inclusion and exclusion) criteria and key sociodemographic features of participants. Provide numbers of participants and how they were selected; **Intervention/Instrument** Describe the essential features of any interventions or of

any data collection instruments or surveys.

Results: Give the primary study outcomes, if available. Measurements that require explanation for a general medical audience should be defined. If in progress, give anticipated results of the study.

Conclusions: Summarize the key take home point of the project or study

Note: For brevity, parts of the abstract should be written in phrases rather than complete sentences.
