Please join us for this one-day hands-on workshop on The University of California Santa Cruz (UCSC) Genome Browser, an essential tool for students and researchers working in genomics and related fields. The Browser allows visualizing genomic data from RNA-seq, ChIP-seq, and other genomic datasets in more than 100 animal species. Users can create their own "tracks" to map their own data on the genome and/or use annotated, publicly available data. No programming skills needed!

This workshop is suited for both new and experienced users. This unique educational opportunity is available to OHSU students and researchers through the USR. **Workshop fee of $20 includes registration, breakfast, lunch, and coffee breaks.**

**Presented by:**
- Robert Kuhn, Ph.D. - University of California Santa Cruz

**Hosted by:**
- University Shared Resources
- Epigenetics Consortium
- Integrated Genomics Laboratory

**Where:**
RJH 4340

**When:**
Thursday, March 12
9a.m.-4p.m.

Please, register by 2/21/2020 to reserve your spot.

Workshop spaces are limited to the first 30 persons.

**Make sure to bring your own fully-charged laptop to this workshop!**

**Registration:**
