

International ACED Early Detection Summer School

*“Discovery and development of diagnostics
for the early detection of cancer”*

**SUMMER
SCHOOL**
EARLY DETECTION
OF CANCER

2020 Virtual Experience
July 6 – 16, 2020

Early Detection Summer School: *Virtual Experience*

Date: July 6 – 16, 2020

Due to travel restrictions and the unanticipated difficulties associated with the global COVID-19 pandemic, Summer School 2020 is going virtual.

The OHSU Knight Cancer Institute, in collaboration with the International Alliance for Cancer Early Detection, proudly presents the second annual international summer school on discovery and diagnostics for the early detection of cancer.

Who should attend?

- Anyone developing new technologies & tests for early cancer
- Anyone interested in exploring this exciting new field

What is the focus of the content?

- Challenges of developing & validating new diagnostic tests
- Scientific, clinical and policy perspectives on new diagnostics

What will attendees gain?

- Knowledge of how new early detection tests translate into clinical practice
- Stronger connections within the early detection community

What is the format?

- Live content delivered conference style with secure login
- Break-out rooms, lightning talks, and additional networking

Programmatic Sessions Include:

- Introduction to the Early Detection of Cancer
- Science and Technology of Diagnostics
- Case Studies for Science / Technology of Diagnostics
- Regulation and Evidence Review
- Clinical Trials and Implementation
- Societal Impacts of Cancer Early Detection

Team Activity: *Envisioning New Diagnostics*

For a truly immersive experience, delegates may choose to participate in a team activity. Envisioning New Diagnostics is presented under the leadership of Dr. Carl Yamashiro from the College of Health Solutions, Arizona State University. Teams will work together to develop and present a business plan for a novel diagnostic test for cancer early detection.

This activity is a simulation to demonstrate:

1. The principles of diagnostic test development
2. Understanding of market saturation
3. Ability to pitch a new diagnostic test as a business proposition.

The team activity culminates over the two-week Summer School with a competitive presentation, bracket-style judging, and coveted prizes to be awarded!

Registration

Registration
Deadline

June 30, 2020

Premium Registration

- Summer School presentations and panels
- “*Envisioning New Diagnostics*” team activity and competition
- Networking opportunities
- *Conference-In-A-Box* gift
- Post conference wrap-up kit

\$125.00

Ala-Carte Registration

- Summer School presentations and panels
- Networking opportunities
- Post conference wrap-up kit

\$80.00
