

Service to Oregon and beyond

FOUNDED IN 1887, THE OHSU SCHOOL OF MEDICINE HAS AN ENDURING COMMITMENT TO EXCELLENCE ACROSS MISSIONS.

We innovate to prepare learners to advance health across and within populations. We seek to understand the origins of disease, fueling the development of life-changing therapies. And we

care for patients and collaborate with providers in communities across the state, expanding access to cutting-edge practices through outreach, technology and partnership.

We do our work with confidence but also with the humility to realize what we don't know. We are seeking multiple perspectives and listening to more voices – including those of our learners – to tackle health disparities, better serve all people and improve the climate of inclusion, respect and wellness in our academic medicine community.

Committed to public service, we are guided by the needs of Oregonians, while sharing our knowledge and experience well beyond.

Sharon Anderson, M.D.
Dean, OHSU School of Medicine

OHSU SCHOOL OF MEDICINE

Healing, Teaching and Discovery

Faces and facts

Destination for transformational learning

We prepare more than 2,200 students and trainees for dynamic health care and biomedical research careers. Through innovative curricula and approaches, our educators train the next generation to lead in health and science.

23	Degree programs, including M.D., Ph.D., and master's, plus many certificate programs
84	Residency and fellowship graduate medical education programs
278	Continuing professional development activities statewide
