

# OHSU Advanced Imaging Research Center

## Return to Research & COVID-19

### Your safety comes first

Your safety has always been our top priority. We have enhanced our commitment to ensure that your visit is safe (and pleasant!)

#### Employee (and visitor) health monitoring

Strict stay-home-if-sick policy & daily temperature monitoring

#### Enhanced cleaning and hygiene

Frequent hand washing is mandated for all employees. Hand sanitizer is distributed throughout the Imaging Center and rooms and equipment will be cleaned before and after each use

#### Reduced number of people within the Imaging Center

Fewer people in common spaces = fewer interactions & encounters = safer environment

#### Reduced MRI schedule density

The MRI schedule density is reduced 2-fold to allow time and space for enhanced cleaning of the MRI instrument

#### Physical distancing

All employees and visitors will maintain 6 feet separation when possible. When we must be closer we will use protective equipment to keep you safe

#### Masks on for all

Masks help reduce the spread of SARS-CoV-2
