

# CROWDS AND COVID-19

## Ways to reduce risk to you and your family

---

Stay home if you're sick.

---

Wear a face covering in public (ages 2+).

---

Wash your hands, and carry hand sanitizer.

---

Stay 6 feet from others when you can.

---

Try not to shout, sing or cough in close quarters  
— it could spread the virus.

---

Keep your distance from others  
when you first get home.

---

Shower soon after returning home.

---

Put your clothes in the wash  
and disinfect surfaces you touched.

---

Watch for symptoms.

---

If someone gets sick,  
pick one person in your home  
to be their primary caretaker.
