CROWDS AND COVID-19

Ways to reduce risk to you and your family

Stay home if you’re sick.

Wear a face covering in public (ages 2+).

Wash your hands, and carry hand sanitizer.

Stay 6 feet from others when you can.

Try not to shout, sing or cough in close quarters — it could spread the virus.

Keep your distance from others when you first get home.

Shower soon after returning home.

Put your clothes in the wash and disinfect surfaces you touched.

Watch for symptoms.

If someone gets sick, pick one person in your home to be their primary caretaker.
