

## University Wards

- 5 one resident/one intern teams (GM 1 – 5) and one night float team
- Team census of 10 patients
- Daily admit census
  - 2 patients to each early call team
  - 3 patients to each late call team
  - 4 patients to night float
- 2 medical students, one PA student, one dedicated teaching faculty member

## VA Wards

- 5 one resident/two intern teams (GM 1 – 5) and one night float team
- Max team census of 16 patients
- Daily admit census
  - 4 patients to each day team
  - 3 patients to each late call team
  - 6 patients to night float
- 2 medical students and one dedicated teaching faculty member

## University MICU

- 4 housestaff teams
  - 3 daytime teams consisting of 2 residents, a flex resident, and 2 interns, and one night team
- A Pulmonary/CC fellow and attending are present on site 24 hours a day and provide direct supervision, assistance with procedures, and teaching
- The night team is staggered between the resident and intern in order to maintain continuity of care for the patients and the team
- The night team receives a post-call day and day off before coming back as a day team
- The night team can admit up to 6 patients
- Formal transition of care occurs at 6pm, whereby the day teams sign out face-to-face with the night team
- Admits are divided up by the fellow throughout the day based on team census and acuity, rather than a strict number
- Most days, the average number of admits per team is 2-3 (total of ~4-6 per day)
- Total census is 20 patients
- Formal didactic sessions occur at noon

## VA ICU

- Comprised of a combined CCU and MICU service
- 4 housestaff teams with one resident and one intern
  - 3 daytime teams and one night team
- The night team is staggered between the resident and intern in order to maintain continuity of care for the patients and the team
- The night team receives a post-call day and day off before coming back as a day team
- The night team can admit up to 6 patients, formal transition of care occurs at 6pm, whereby the day teams sign out face-to-face with the night team
- Admits are divided up by the fellow throughout the day based on team census and acuity, rather than a strict number
- Most days the average number of admits per team is 2-3 (total of ~4-6/day\_
- Total census is 15 patients
- Formal didactic sessions each afternoon by either a cardiologist, pulmonologist, or other special guest
