INTRODUCTION

The Graduate Programs in Human Nutrition (GPHN) at Oregon Health & Science University (OHSU) encompass the Dietetic Internship (DI) graduate certificate program, the Master of Science in Human Nutrition (MSHN) program, and the Master of Science in Food Systems and Society (FSS) program. This handbook addresses the DI and MSHN programs. The requirements and policies of the FSS program are outlined in a separate handbook. There are two paths to receive a MSHN degree: one is to complete the MSHN requirements in combination with the dietetic internship (referred to as the MSDI), the other is to complete the MSHN requirements after previously completing a dietetic internship—at OHSU or elsewhere. The MSHN degree is offered with a thesis or capstone option.

After establishing foundational knowledge in an undergraduate Didactic Program in Dietetics (DPD), students/interns entering the DI, MSDI or MSHN programs engage in practical, competency-based learning and professional development in addition to didactic coursework. This manifests in the DI program as supervised practice hours in a nutrition/dietetics-related setting to build core competencies for a career as a Registered Dietitian Nutritionist (RDN). In the MSHN programs, students/interns focus on research, statistics, and advanced critical thinking skills applicable to a nutrition/dietetics career. In the MSHN thesis-option, students, working under the guidance of a faculty mentor and their thesis advisory committee, complete a novel research project, analyze the data collected from the project and present the results of their project both as a written thesis and oral defense. Students in the capstone option, under the supervision of their mentor, develop a project that addresses a question or problem of practical importance such as developing a test or education method, evaluating an intervention, curriculum, or protocol aligned with a particular agency or practice setting. Upon completion, the project is summarized in a capstone final report and written deliverable as well as an oral presentation in the form of a seminar to faculty, students/interns, and the public.

This handbook lays out the basic roadmap for the three of the four tracks in the GPHN, and describes program-specific missions, procedures, policies, and recommendations. The MS in Food Systems and Society, also part of the GPHN, is not addressed in this handbook. As part of the OHSU School of Medicine (SOM), the GPHN is governed by the [OHSU Code of Conduct](#), the School of Medicine (SOM) [Graduate Council By-Laws](#) , general [OHSU Academic Policies](#) and [Student Affairs Policies](#). Students/interns should familiarize themselves with these, as well as the [SOM Graduate Student Handbook](#).

For additional information and links to these policies, refer to [Appendix B](#).

Mission Statement of the Graduate Programs in Human Nutrition

The Graduate Programs in Human Nutrition supports the overall vision of OHSU, which is to improve the health and quality of life for all Oregonians through excellence, innovation and leadership in health care, education and research. A fundamental priority throughout OHSU is to enable each student to achieve their potential as a health care professional while efficiently and effectively meeting the health-related needs of the multiple communities they serve.

Our program strives to provide our students with a dynamic array of knowledge and skills so that they are prepared to practice in and advance the fields of nutrition and dietetics. We also believe strongly in giving back to the profession, and it is our hope that students will be inspired to help others and to advocate for themselves and the profession.

ACCREDITATION

The GPHN is accredited by the [Accreditation Council for Education in Nutrition and Dietetics \(ACEND\)](#), the accrediting body of the Academy of Nutrition and Dietetics. ACEND exists to serve the public by establishing and enforcing quality standards for the educational preparation of dietetics practitioners, and by recognizing dietetics education programs that meet these standards. At the July 2017 ACEND board meeting, the board voted to continue full accreditation of our program for a term of seven years ending December 31, 2024. The next accreditation review of our program by the ACEND board will be in 2024.

Attending and successfully completing the DI or MSDI at OHSU allows students/interns to apply for eligibility to sit for the registration exam administered by the Commission on Dietetic Registration (CDR). To learn more about the RDN exam, contact the CDR.

COVID-19

Information about OHSU's response to COVID-19 and its impacts can be found on the OHSU [COVID-19](#) O2 page. Student/intern specific information pertaining to modification instituted in response to COVID-19 can also be found at this location under the [Student Onward](#) section. The COVID-19 response is rapidly changing and updated information will be sent to students/interns through email and OHSU announcements; however, the most up-to-date information about COVID-19 is available on the OHSU O2 page. Students/interns must become familiar with all updates and changes related to COVID-19 and consistently practice required precautionary measures.

ACADEMIC CALENDAR**YEAR OVERVIEW**

Students/interns will be granted pre-scheduled leave during the year, which includes fall break (if applicable), Thanksgiving Day and the day after Thanksgiving, winter break, spring break, and summer break (if applicable). Other holidays observed include Martin Luther King, Jr. day, Presidents' day, Memorial day, Independence day, and Labor day. For students in a master's program, advisors should be consulted before any extended leaves are planned as students may have work to complete during holiday breaks. All interns, including MSDIs in their first year, should review and abide by the [Absences section](#) of this handbook.

For specific registration dates and deadlines, including deadlines to withdraw or receive a tuition refund, consult the Registrar's Office's comprehensive [Academic Calendar](#).

COMMUNICATION

OHSU EMAIL

All students/interns are issued an [OHSU email account](#) and are expected to use this email account for all correspondence relating to the program including communication with preceptors. Students/interns should check this email account daily at the minimum and respond to email requests as soon as possible. If you receive any spam emails, forward the entire message to antispam@ohsu.edu.

CONNECTING REMOTELY TO OHSU COURSES AND EVENTS

Due to the Covid-19 pandemic, all 2020 Summer and Fall Term courses will be delivered remotely. Decisions regarding course delivery during 2021 Winter and Spring Terms is pending and will be announced later during the Fall Term. Some courses will be offered synchronously (all learners link into courses/activities at a scheduled time), others will be offered asynchronously (learners view course instruction on their own schedule) while other courses will be delivered using a hybrid model. To promote active, participatory learning, all students/interns are required to have access to high-speed internet and a computer with a microphone and camera to participate in classes remotely. Likewise, all students/interns are expected to have a hardwire connection to the internet with an Ethernet cable or similar system to allow continuous participation in classes. Due to limited bandwidth, Wi-Fi should not be used to connect to classes. In addition, all students/interns are required to download and have access to WebEx or the virtual meeting space of choice at OHSU. Information on WebEx and instructions for installation is provided by [ITG](#). While there are multiple options to virtually connect with other students/interns, we strongly encourage you to use WebEx, or the platform required by OHSU, to connect about any course-related work to ensure that your communication is in compliance with OHSU's Privacy Policies. If OHSU transitions to another platform, students will be encouraged to use the updated system. Information about course delivery and attendance during 2021 Winter and Spring terms will be provided at a later date. If there are any connectivity issues, contact ITG at 503-494-2222..

STUDENT CENTRAL

[Student Central](#) serves as a home of news, information and resources for OHSU's more than 3,500 students across the schools of Dentistry, Medicine, Nursing, the OHSU-PSU School of Public Health and the College of Pharmacy.

STUDENT OFFICES, COMPUTERS & PRINTERS

Due to COVID-19 and until further notice, access to faculty and student/intern offices and classrooms in Gaines Hall is restricted to essential personnel, only, and all faculty and students/interns are required to work from home. When this restriction is lifted and students/interns are allowed on campus, the student/intern office in Gaines Hall is located room 48 on the ground floor. A key code is required to use Gaines Hall 48. This code will be sent to all incoming students/interns once the restriction to be on campus are lifted.. Computers, printers, refrigerators, microwaves, and water coolers are located in the office for student/intern use. Students/interns are responsible for keeping this space clean and presentable, and removing trash.

Students/interns are required to have a personal computer and printer for on-going use but especially during the COVID-19 pandemic. Once the restriction to be on campus is lifted, computers and printers are available for use in

the student/intern office, but space and resources are limited. Additional computers and printers are located in the OHSU Library on the 3rd floor of the Biomedical Information Communication Center (BICC).

Several specialized software programs are available to students/interns in the student/intern office in Gaines Hall including STATA-IC, Prism, and ESHA Food Processor.

Acceptable use of GPHN printers: The GPHN provides printers for student/intern use as a courtesy only, these printers are not meant to be a student's/intern's primary print source. The bulk of printing should be done on the student's/intern's own printer.

COPY CODES

Once the restriction to the OHSU campus is lifted, students/interns are strongly encouraged to [apply for a copy code through the OHSU Copy Center](#) and load a small amount of money (e.g., \$5 or \$10) onto this account for use with the copier and printers in the library and the copiers in Gaines Hall and other locations.

SAKAI

[Sakai](#) is OHSU's online course management system and includes a suite of useful web-based tools supporting communication and collaboration. Most courses have a Sakai component, which could include posted videos or assignments, supplemental reading, or as a platform to facilitate assignment submissions, quizzes, and online discussions.

Students/interns log into Sakai with their OHSU credentials (username and password). The Sakai classroom management system is supported by the Sakai Help Desk which can be contacted via e-mail at sakai@ohsu.edu or by phone at 877-972-5249.

TRAJESYS

Trajecsys is GPHN's supervised practice tracking system for the dietetic internship. Trajecsys will be used to track rotation and simulation hours, competencies, and preceptor evaluations. Each student/intern and preceptor will have their own unique log in to access this web-based software system. Students/interns will receive an invitation from Trajecsys and will be asked to create a user ID, which once created cannot be changed. OHSU email addresses should be used as the primary email address when using Trajecsys. When creating a password for Trajecsys it is required that the password also meets the requirements of the OHSU [password policy](#).

BLUE COURSE EVALUATIONS

To continually improve and refine course content and delivery, OHSU has developed a standardized online evaluation survey that allows students/interns to efficiently provide feedback on courses and instructors. This information is reviewed by the OHSU Executive Vice Provost, GPHN Program Director, Instructors and GPHN curriculum committee members, in the form of composite numeric scores and narrative comments. Feedback to instructors should be professional and constructive in nature and include comments about both strengths and opportunities for improvement as appropriate. We value student/intern comments and expect all students/interns to participate in this anonymous online evaluation process. Although individual responses are not identifiable, participation is monitored as we maintain a completion rate goal of 100%.

Course evaluations will be open seven days prior to end of the course and close seven days after the end of the course. Students/interns will receive an email message one week prior to their courses ending, prompting them to log into Sakai to complete their course evaluations. The email will contain a link to the course evaluation page, which can be accessed once the student/intern logs into Sakai. Students/interns will receive an email reminder every three days until the evaluations close. Once done, the student/intern will see a list of course evaluations for each course taken during the term. Students/interns can also access the course evaluations via the "My Workspace" area in Sakai.

MAIL

Incoming mail addressed to the program is held in the administrative office in Gaines Hall, Room 207 (mail code: GH 207). If a student/intern needs to receive correspondence from off-campus, it should be addressed to:

Graduate Programs in Human Nutrition
Oregon Health & Science University
3181 SW Sam Jackson Park Road
GH 207
Portland, OR 97239-3098

Parcels and couriered mail should be addressed using our street address:

Graduate Programs in Human Nutrition
840 SW Gaines St
GH 207
Portland, OR 97239

We will forward program-related mail to students/interns placed outside of the Portland-metro area.

OHSU ALERT LINE

The [OHSU Emergency Mass Notification System \(OHSU ALERT\)](#) allows OHSU to notify students/interns, faculty, staff, and the surrounding campus community, in the event of an emergency by sending a broadcast message via text message, pager, or both. OHSU Alert is a method of communicating emergency information to a large number of people as quickly as possible. It is not used for non-emergency, routine or spam messages. The telephone number for the OHSU Alert Line is 503-494-9021.

STUDENT RECORDS

The Family Education Rights and Privacy Act (FERPA) governs access to student files. Students/interns should review the annual notification of student rights (under general information) on the [Registrar's website](#) for a full explanation of rights under FERPA. Additional information regarding student records can be found in the [Student Records Policy](#)  and [Graduate Council By-Laws](#) . Students/interns can use the [Student Information System](#) to display grades, display unofficial transcripts, review charges and make payments online, review holds (if they exist), view personal information such as address, e-mail, etc., view and/or print class schedules and register for classes.

STUDENT LIFE

The [Office of Student Life](#) at OHSU sponsors a variety of services, programs and events to educate, advocate, entertain and challenge students/interns. Through its dynamic interdisciplinary environment that stimulates inquiry, initiative and cooperation, OHSU's student-centered programming cultivates a sense of community and interprofessionalism that is unique to OHSU.

The Office of Student Life includes a broad range of services and programs devoted to the social, physical, psychological, financial, ethical, and cognitive development of all OHSU students.

The [Center for Diversity & Inclusion \(CDI\)](#) leads and supports the university-wide initiatives to create an environment of respect and inclusion for all people. CDI is dedicated to fostering partnerships to enhance OHSU's mission of healing, teaching, research and community services. With a range of resources and services, CDI supports and empowers students/interns, faculty and staff from all walks of life, including historically underrepresented populations.

ACCESSIBILITY

OHSU is committed to inclusive and accessible learning environments in compliance with federal and state law. If a student/intern has a disability or think they may have a disability (mental health, attention-related, learning, vision, hearing, physical or health impacts), contact the Office for Student Access at (503) 494-0082 or [OHSU Student Access](#) to have a confidential conversation about academic accommodations. Information is also available at [Student Access Website](#).

Advanced planning is needed to ensure the timely provision of appropriate accommodations. It is important to allow sufficient time for a program and/or the institution to put accommodations and appropriate auxiliary aid(s) into place. Therefore, students/interns must turn in their requests for accommodations six weeks prior to the beginning of the next term for which the accommodations are being requested. If a request is submitted after the relevant deadline, Student Access will make every reasonable effort to accommodate the request but cannot guarantee that an untimely request can be met. Requests submitted less than six weeks before the start of the term may result in delay, substitutions, or denial of accommodation. Because accommodations may take time to implement and cannot be applied retroactively, it is important to have this discussion as soon as possible.

If a student/intern has been provided accommodations, it is the student's/intern's responsibility to inform each instructor and preceptor individually about accommodations at least 10 days prior to the start of the course or rotation, respectively.

ACADEMIC STANDARDS & ADVISING

GRADING POLICY

Per [OHSU Academic Policy 02-70-020](#), each academic program stipulates standards for academic progression and graduation including a minimum required grade for specific courses. Students/interns must receive a P or a grade of B- or higher to pass all NUTN courses.

ADVISING & PROGRESS REPORTS

During the internship, students/interns will meet with the DI Director and/or Associate DI Director at least once per term during fall, winter, and spring terms to discuss progress in rotations and monitor the attainment of the core competencies in nutrition/dietetics.

Master's students will meet with the Master's Program Coordinator at least twice a year for academic advising. Additional meetings may be scheduled as needed to abide by Graduate Studies policies and facilitate efficient progression towards degree completion.

CONTINUOUS ENROLLMENT

All students/interns admitted to the GPHN must be continuously enrolled until graduation, except for periods of time covered by an approved leave of absence. Taking a minimum of one credit per term during the regular academic year (Fall, Winter and Spring terms) constitutes continuous enrollment. Registration during the Summer term is not required to meet the continuous enrollment requirement but may be required for defense and submission of a thesis or capstone. Failure to register by the sixth week of the term without an approved leave of absence will result in administrative withdrawal of the student's/intern's admission to the GPHN.

APPLICATION FOR GRADUATE CERTIFICATE OR DEGREE

To be eligible to graduate with a graduate certificate (e.g., the dietetic internship) or degree (e.g., the MSDI or MSHN), the student/intern must maintain a minimum cumulative GPA of 3.0, pass all required courses with a grade of "B-" or above, complete the required minimum number of credits, complete all planned supervised practice and simulation experiences as required by ACEND, which may exceed 1,200 hours (if applicable), and finish all thesis or capstone requirements (if applicable). The Application for Degree form must be completed online through the Student Information System (SIS) one term before the student's/intern's expected graduation. From the time of matriculation, students/interns have six years to complete graduate degree or certificate requirements, unless granted a leave of absence.

Note: The Application for Degree form must be filled out *exactly* to reflect the student's/intern's expected degree. DI students/interns will select "Dietetic Internship" under the School of Medicine Certificate option. Students in the masters programs (MSDI and MSHN) will select the "MS" degree under the School of Medicine.

ASSESSMENT OF PRIOR LEARNING

Our program offers students/interns the opportunity to request a waiver for only one course (NUTN 514) within our curriculum. We do not grant supervised practice hours or waive any other required courses based on an assessment of prior learning or competence.

Students/interns entering the program with a thesis-requiring Master's or Doctoral-level degree may petition for waiver of credit for NUTN 514 (Nutrition Research and Scientific Communication; 3 credits) if the student's/intern's transcript indicates that a similar graduate-level course was completed within the past three years with a grade of B or higher. The student/intern will then register for 3 credits of Independent Study or elective courses pertaining to a relevant area of study.

All waivers must be approved by the GPHN Program Director, the Associate Dean for Graduate Studies, and the Registrar. All waiver decisions will be clearly documented in the student's/intern's file. To request a course waiver, use the Course Transfer Approval Request Form located on the [School of Medicine Graduate Studies website](#).

ABSENCES

Attendance at all program-related supervised practice rotations, simulation activities, and courses, including all virtual sessions, is required at all times and in a punctual manner. Please see all course syllabi for specific attendance policies. Attendance at Simulated Activities and Courses

If a simulation activity or course must be missed, for any reason, it is the responsibility of the student/intern to contact the course instructor in advance by e-mail. Should access to the internet not be available due to an outage or emergency, students/interns may contact the GPHN Program Director via text or phone call at 971-227-2569. Students/interns should be aware that it may be difficult or impossible to make up the missed material. When the restriction from campus is lifted, students/interns placed in the Portland metropolitan area are expected to participate in all simulation activities and courses in person. Students/interns placed in Medford and Bend are always welcome to attend simulation activities and courses in Portland in person; however, given the travel required, are allowed to join through WebEx from their primary geographic placement. Students/interns completing rural campus rotations are permitted to connect via WebEx to sessions that occur during their rural rotation. Whether attending in person or through WebEx, all students/interns should arrive at least five minutes before the start of each session to avoid disrupting the speaker and their classmates.

LEAVE OF ABSENCE

Extended absences may require a formal leave of absence. As stipulated in the [Graduate Council By-Laws](#) , a leave of absence may only be granted to a student/intern who is in good academic standing at the time of the request.

For additional information, consult the [Voluntary Leave of Absence & Withdrawal Policy](#). The Leave of Absence form can be found on the [Registrar's Website](#).

INCLEMENT WEATHER

In the event of inclement weather, (i.e., snow or freezing rain) every attempt should be made to reach a rotation site or class as scheduled, as long as it can be achieved safely. If delayed, students/interns should contact the preceptor or course instructor and inform them of the delay as soon as possible. Should access to the internet not be available due to an outage or emergency, students/interns may contact the GPHN Program Director via text or phone call at 971-227-2569. Public transportation may experience delays but usually remains open. If a decision is made to cancel classes at OHSU, this will be communicated on the OHSU Alert Line, the O₂ website, and by the instructor. If inclement weather affects a rotation day, the student/intern is advised to follow the guidelines outlined by the facility to which they are assigned on that day. In the event of inclement weather, updates are placed on [the O₂ website](#).

HOUSING FOR ROTATIONS

Students/interns are expected to arrange and pay for their own housing for the duration of the program. When students/interns are placed at a supervised practice site that is more than 50 miles from their primary geographic

placement (Portland, Medford, or Bend), the program will assist students/interns, at their request, to arrange temporary housing near the rotation site.

Housing secured and/or paid for by the program will meet the minimum requirements of the [OHSU Housing Policy](#) and [Procedure](#). Please note that OHSU-provided housing is for the student/intern only, and does not include spouses, partners, children, or pets.

ROTATIONS BETWEEN 40-50 MILES FROM PRIMARY GEOGRAPHIC PLACEMENT

Housing through the OHSU housing department is available for rotations in Oregon that are located 40 miles or more from the student's/intern's primary geographic location. If a student/intern is placed in a rotation 40-50 miles from their primary geographic location they may opt to use this resource at their own expense.

ROTATIONS GREATER THAN 50 MILES FROM PRIMARY GEOGRAPHIC PLACEMENT

OHSU or the program may pay for housing at OHSU –sponsored housing facilities or provide a housing stipend to help cover the cost of housing for the duration of the rotation.

STUDENT CHOICE ROTATIONS

If a student/intern chooses to complete a Student Choice rotation at a facility located more than 50 miles from the primary geographic placement, then all housing arrangements and costs associated with these arrangements will be the responsibility of the student/intern. Please refer to the [OHSU Housing Policy](#) for more information.

TRANSPORTATION

Travel to and from rotation sites or other off-campus sites is the responsibility of the student/intern. Access to a car is recommended, but other reliable forms of transportation are acceptable, such as public transit. Distances between the student's/intern's primary placement site and/or ancillary rotation sites may vary and it may be necessary for the student/intern to travel extended distances. All students/interns are required to travel to their scheduled rotation site, regardless of distance. The GPHN does not pay for travel expenses, nor does the program provide vehicles for student/intern travel to external sites.

Travel Liability Statement

The GPHN and OHSU assume no responsibility for student/intern travel. Vehicle insurance and expenses are the responsibility of the student/intern. If the student/intern is a passenger in a car traveling for program-related business—including supervised practice rotations—the driver must carry liability insurance for coverage in the event of a car accident.

EXPENSES

TUITION & FEES

OHSU's [Tuition and Fee Book](#) is available to view on the Registrar's Office site, under "Dietetic Intern, Master of Science in Clinical Nutrition or Human Nutrition." Exact tuition charges vary based on the number of credits taken per term. For deadlines to withdraw or receive a tuition refund, consult the Registrar's Office's comprehensive [Academic Calendar](#).

Major medical and dental insurance is required for all students/interns and is available through [OHSU's student insurance plan](#); however, fees for major medical and dental insurance may be waived if the student/intern has comparable insurance and applies for a waiver from the Student Health & Wellness Center.

ADDITIONAL EXPENSES (ESTIMATED)

Background Check (approximate) <i>Fee is based on current and previous states of residency. The GPHN or OHSU may reimburse a portion of this fee. Please keep all receipts.</i>	\$60.00
Academy of Nutrition and Dietetics Student Membership <i>Required for all students enrolled in the Dietetic Internship, MS/DI or MSHN track.</i>	\$58.00
ServSafe Manager Certification (DI and MSDI only)	\$153.00
Basic Life Support for Healthcare Providers course	\$93.00
Housing (approximate) <i>Students/interns are responsible for making their own housing arrangements, estimated to be \$700.00 per student/intern per month for a shared apartment.</i>	\$7700.00
Transportation (approximate) <i>A car or other form of dependable transportation is required for transportation to and from rotation sites.</i>	\$1,000.00
Textbooks (approximate)	\$300.00
Official Transcripts for CDR Verification for RDN Exam (approximate)	\$15.00
Laptop computer, webcam, microphone, high-speed internet and printer	\$950.00
Total (does not include tuition and fees)	\$10,329.00

PARKING & TRANSPORTATION FEES

Parking at OHSU is extremely limited. Once the restriction to campus is lifted, students/interns may ride the OHSU Shuttle, Portland Streetcar, and Portland Aerial Tram free of charge when wearing an OHSU ID Badge. TriMet (bus and MAX) and C-Tran passes are available at a 70% reduced price. OHSU is also easily accessible by bike and there is free valet bike parking available at the South Waterfront campus. More information is available from [OHSU Transportation & Parking](#). Please note that during the restriction from campus, use of the Tram for reasons other than rotation-related business is not allowed.

SCHOLARSHIPS AND AWARDS

The Academy of Nutrition and Dietetics Foundation offers a variety of scholarships. Award details and eligibility requirements may be found on the [Academy Foundation scholarship site](#).

The [Oregon Academy of Nutrition and Dietetics](#) typically offers a modest scholarship to an Oregon student(s). Students/interns are nominated by their program faculty and cannot nominate themselves for these awards. To be eligible for certain student awards, the student/intern must be a member of the Oregon Academy. To become a member, the student/intern must change their state affiliation with the Academy of Nutrition and Dietetics.

[Western Maternal Child Health Nutrition Partners](#) offers at least four scholarships per year through their Trainee program to support nutrition graduate students at partner institutions—including OHSU—with an emphasis on leadership development.

The [LEND Nutrition Fellowship](#) provides participants with hands-on training in nutrition assessment and medical nutrition therapy for children with disabilities with particular emphasis on interdisciplinary team approach.

[The Center for Diversity and Inclusion](#) also compiles a list of scholarships available to graduate students interested in areas of the health and sciences.

[GSO Travel Award](#) recognizes outstanding work by OHSU graduate students, and contributes to their professional development by helping fund travel to distant sites for scholarly purposes.

[OHSU Global Student Overseas Travel Award](#) is a competitive award of up to \$2,000 to support overseas experiences.

[Be Midge's Hero](#) scholarship is awarded in honor of Midge Steuber to nutrition students/interns who demonstrate evidence of a personal commitment to a plant-strong, whole foods-based lifestyle, and a sustained interest in promoting this lifestyle in future professional pursuits. Award amount varies.

[Tartar Trust Fellowships](#) are offered annually by the OHSU School of Medicine. An applicant must be a student/intern, fellow, or faculty member in the School of Medicine and be a resident of the State of Oregon. It is intended to be used for supporting research endeavors and research career development in the School of Medicine. The \$2,000 award term is a one-year duration (matching the OHSU fiscal year period).

PROFESSIONALISM

It is the goal of the GPHN to help students/interns make the transition from students/interns to professionals as quickly and easily as possible. The [OHSU Code of Conduct](#) , [Professional Conduct Policy for Graduate Programs of](#)

[the School of Medicine](#), [Academy of Nutrition and Dietetics Code of Ethics](#), and this handbook serve as guides for conduct at all times. Student/intern professionalism will be assessed continually by preceptors, faculty, and staff. Appropriate behavior is an important component to student/intern success.

OHSU: CODE OF CONDUCT

As members of the OHSU community, students/interns are expected to uphold the standards outlined in the OHSU Code of Conduct, which guides the behavior and performance of all members of the OHSU community. The OHSU Code of Conduct can be found on [the OHSU website](#).

PROFESSIONAL CONDUCT POLICY FOR GRADUATE PROGRAMS OF THE SCHOOL OF MEDICINE

This policy was approved by the Graduate Council to establish expectations for graduate students in academic programs in the School of Medicine. Graduate students are held to a higher standard than undergraduate students, are understood to be laying a foundation for their professional career or continued research, and expected to review and abide by the points made in the [Professional Conduct Policy](#).

FORMS OF ADDRESS

Unless given permission to do otherwise, use the formal form of address Mr., Ms., Mrs., Miss, Dr. or Professor, rather than the first name when addressing faculty, staff, preceptors, clients and other members of the health care team, including dietetic technicians, food service staff, or clerical personnel.

Gender identities and expressions can be very diverse. Most people use either a feminine pronoun (she/her), a masculine pronoun (he/him) or a neutral pronoun (they/them). For example, when referring to someone who is identified as female or feminine, she may wish to be addressed as “she,” and her pronoun would be displayed as “she/her.” In a sentence you would say, “My co-worker is Mary, she is on a lunch break. You can leave her mail on her desk, and I will check with her to make sure she received it.” When referring to someone who identifies outside of the gender binary of male or female, they may wish to be addressed with the neutral pronoun of “they” and their pronoun would be displayed as “they/them.” In a sentence you would say, “My co-worker is Sam, they are on their lunch break. You can leave their mail on their desk, and I will check with them to make sure they’ve received it.” When in doubt, refer to a person using the pronouns identified on their OHSU identification badge or ask how he/she/they would like to be addressed.

CONFERENCES

To enhance professional development and to begin professional networking, students/interns are encouraged to attend conferences pertaining to nutrition and dietetics. As part of their course of study, students/interns may be required to attend professional meetings, such as the Oregon Academy of Nutrition and Dietetics annual conference.

PUBLICATIONS & PRESENTATIONS

One way to forge a professional name for oneself is to write for publication. While not required, students/interns are encouraged to explore professional writing experiences, such as writing articles for professional newsletters or the OHSU School of Medicine student blog. Presentation opportunities exist for students/interns at the Portland

Academy of Nutrition and Dietetics meetings, the Oregon Academy of Nutrition and Dietetics conference, and the OHSU Research Week poster sessions for posters developed in conjunction with NUTN 514, thesis/capstone work, or NUTN 500 community outreach projects. Other opportunities to attend conferences may arise throughout the academic year, which should be discussed with the GPHN Program Director.

APPEARANCE & ID BADGE

All students/interns are expected to abide by the [OHSU Professional Appearance Policy](#)  whether in class or rotations including all virtual or remote program activities. Although classrooms may not be located within a building that provides patient care, students/interns may have occasion to walk through OHSU patient care areas throughout the day, and it is good practice to maintain a professional demeanor at all times. Students/interns in rotations outside OHSU should be aware that each facility may have their own appearance policy. When in rotations at other facilities, students/interns must follow the policy of the facility in which they are placed.

While on campus or at a rotation site, the student's/intern's OHSU-issued Identification Badge and/or affiliated site badge must be worn at all times in a visible, upright position at chest or collar level. Badge holders must be kept clean. Identifying information must be visible to others with whom the student/intern interacts. Lanyards are not allowed for hygienic and safety reasons.

SUPERVISED PRACTICE

Dietetic preceptors at OHSU and all of our affiliated sites serve in this important educational role because of good will, a desire to mentor, and a commitment to the nutrition and dietetics profession. The impression a student/intern leaves with preceptors, patients, and clients is important for future success, as well as for the program to maintain good working relationships with all of these generous practitioners. First and foremost, students/interns should be prompt in all communications and meeting appointments, and in carrying out all assignments. Some preceptors may be future employers. It is very important to make a consistent and positive impression. To show appreciation, we strongly encourage students/interns to write thank you notes to preceptors after each supervised practice rotation.

Successful completion of supervised practice is partially based on the preceptors' assessment of professional attributes, as well as the student's/intern's ability to demonstrate the core competencies of our profession. Please remember that competence and professional attributes are assessed independently and students/interns must demonstrate achievement in both areas.

Rotation sites may have additional professional appearance and conduct policies. Follow all guidelines as directed at each supervised practice site. Students/interns should wear the white laboratory coat provided by the GPHN over street clothes in all patient care and food handling areas, unless directed otherwise by a preceptor.

Further details related to supervised practice expectations are specified in the NUTN 504: Supervised Practice course syllabus. Additional information on contacting preceptors prior to the start of rotations is also provided on Sakai within the preceptor contact lists.

ETHICS

ACADEMY OF NUTRITION AND DIETETICS CODE OF ETHICS

The Academy and its credentialing agency, the Commission on Dietetic Registration (CDR), believe it is in the best interest of the profession and the public it serves to have a [Code of Ethics](#) in place that provides guidance to dietetics practitioners in their professional practice and conduct. Dietetics practitioners and members of the Academy have adopted this Code of Ethics to reflect the values and ethical principles guiding the nutrition and dietetics profession and to set forth commitments and obligations of the dietetics practitioner to the public, clients, the profession, colleagues, and other professionals. All GPHN students/interns must maintain membership in the Academy of Nutrition and Dietetics and are, therefore, bound to the professional Code of Ethics.

RESEARCH INTEGRITY

[Research Integrity](#) ensures compliance with all laws, regulations and guidelines that govern human, animal, basic science and applied science research at OHSU. Research Integrity provides professional support and oversight for the Institutional Review Board, the Institutional Animal Care and Use Committee, the Institutional Biosafety Committee (IRB) and the Conflict of Interest in Research Committee.

ELIGIBILITY FOR REGISTRATION EXAM & LICENSURE

Within the last few weeks of the program, the Program Director will collect information from each student/intern to complete the eligibility paperwork for the registration exam for dietitian nutritionists (RDN exam).

Students/interns who successfully complete the DI program receive a verification statement signed by the DI Director and a graduate certificate awarded by OHSU. Verification Statements are signed by the DI Director after the student/intern has met all competencies for NUTN 504, met all professional attributes described on the professionalism evaluation form, completed at least 1,200 hours of supervised practice rotations or the required number of hours specified by ACEND, through all scheduled supervised practice rotations, course activities and simulated experiences, passed all required courses with a grade of “Pass” or “B-” or better and maintained an overall grade point average of 3.0 or higher.

Students/interns will be provided with at least six signed original copies of their individualized Verification Statement no sooner than the week after grades are due indicating successful completion of the dietetic internship. In addition, an original signed verification statement is maintained in the program files. If not already on file, students/interns must provide an official/primary source transcript, which includes date the degree was awarded/conferred/granted, of their highest degree earned and an official copy of their DPD verification statement. For students/interns in the MSDI program, the transcript will be their official OHSU transcript.

Upon completion of all program requirements, exit paperwork is processed and submitted to the Commission on Dietetic Registration (CDR) for the student/intern to be granted eligibility to sit for the registration examination for Registered Dietitians Nutritionists (RDN). State licensure and state certification are entirely separate and distinct from registration or certification by the CDR. Upon successful completion of the registration exam for dietitians, graduates are eligible to apply for individual state licensure or certification as established by each distinct state. Information on Oregon state licensure can be found at the Health Licensing Office” of the Oregon Health Authority website. Graduates should receive confirmation of their RDN exam application eligibility from CDR within

approximately two to three days via email. Graduates will also receive the registration exam application and handbook from Pearson VUE with specific instructions for testing.

For MSDI students, Verification Statements will not be signed until **the MS degree is conferred by OHSU**. Degrees are not conferred by OHSU until the end of the term in which the student completed their degree requirements. Instructions for ordering an official OHSU transcript can be found on the Registrar's website at [Order Official Transcripts](#). When ordering an official transcript for RDN exam eligibility, select the option to have the transcript sent only after the degree is conferred.

ELECTIVES

Nutrition electives are available through the GPHN in the summer, fall, winter, and spring terms with varied course content. Elective credits may also be taken through other programs on campus when available.

DI students/interns are welcome to enroll in any GPHN or IPE elective. For DI students/interns interested in applying to the master's program, taking electives during the DI year may expedite the completion of a master's degree, if accepted into the program. For elective guidelines for MSDI and MSHN students, please see the program overviews for each program.

INTERPROFESSIONAL EDUCATION (IPE)

The goal of the OHSU Interprofessional Initiative, launched in May 2012, is to prepare all OHSU students/interns to deliberately and intelligently working together with a common goal of building a safer and more effective patient-centered and community-oriented health care system ultimately impacting the health and well-being of populations worldwide. As part of the curriculum, dental, medical, nursing, nutrition, physician assistant, and radiation therapy students/interns are required to attend IPE sessions during their first year at OHSU.

The one credit course, [IPE 501: Foundations of Patient Safety and Interprofessional Practice](#), is designed for early health care learners from all OHSU schools and programs to introduce them to the importance of best practices for professionalism, roles and responsibilities, teamwork, communication, ethics, and collaborative practice as a means to improve the quality and safety of patient care. MSDIs (in their first year) and DIs are required to take the IPE Foundations course, which will be offered remotely during the 2020-2021 academic year.

INFORMATION TECHNOLOGY

Students/interns are responsible for the computer and mobile devices they use during their studies at OHSU. If students/interns wish to use a computer to access OHSU resources, please ensure that you are using an up-to-date, vendor-supported operating system. See *Private Wi-Fi (OHSU-Secure)* below for details on the various software required to connect to OHSU's private Wi-Fi network.

In addition, students/interns must abide by OHSU's [Acceptable Use of Computing and Telecommuting Resources](#) policy. The following information will help students/interns use computing resources in line with that policy as well as OHSU's additional information privacy and security policies. For a complete list of policies, visit the Information Privacy and Security site on O2 (intranet) at <https://o2.ohsu.edu/oips>.

WIRELESS INTERNET ACCESS

There are several ways to connect to wireless internet, whether on campus or on the go.

SHARED GLOBAL WI-FI (EDUROAM)

The eduroam wireless network is a shared global wireless service for participating research and education institutions. Connect to the eduroam wireless network quickly and easily using a OHSU username and password at more than 450 colleges, universities and research facilities in the United States. Visit <https://www.eduroam.us> for a full list of participating institutions.

Connecting at OHSU is simple:

1. Turn on device's **Wi-Fi**. (Disable Airplane Mode on smartphones and tablets.)
2. Connect to the **eduroam** wireless network.
3. At the login prompt, enter complete OHSU email address and password. Connect to the eduroam network.
4. If there is a trust certificate prompt, accept it.
5. After the device connects to the eduroam network, it will have internet access.

PRIVATE WI-FI (OHSU-SECURE)

OHSU-Secure is a secured wireless network that is provided for OHSU employees, students/interns and affiliates. To access internal resources on the secure network, the computer must meet the requirements outlined below. Note that anti-virus software is also required, in addition to the specific software listed below.

PUBLIC WI-FI (OHSU-GUEST)

OHSU-Guest is an unsecured wireless network that is provided for OHSU patients, visitors, vendors and others who need internet connectivity. Because OHSU-Guest is outside of the secure network, it is not protected by the firewall. Therefore, it should **not** be used by OHSU employees, students/interns and affiliates.

MOBILE DEVICE MANAGEMENT

If students/interns want OHSU email delivered directly to an app on their smartphone, students/interns must take steps to protect that mobile device: It must be enrolled in OHSU's mobile device management program. To learn more, go to the [personally owned mobile devices page on O2](#).

TWO-STEP AUTHENTICATION

Two-step authentication (also called multi-factor authentication) is required to log in to certain OHSU systems from **outside** the OHSU-Secure wireless network.

OHSU uses Duo Mobile for two-step authentication.

To learn more, go to the [Duo Mobile page on O2](#).

CLOUD STORAGE

Box.com is OHSU's approved cloud storage service. Students/interns can use it to store school-related files and share them with others. There is no storage limit, and students/interns can upload files as large as 15 GB. To get started, log in directly at <https://ohsu.box.com/> with a OHSU username and password.

Other common cloud storage services, such as Dropbox, Google Docs, OneDrive and iCloud, should **not** be used for OHSU restricted information (see the *Protecting restricted information* section), because these services have not agreed to comply with OHSU's information privacy and security policies. To learn more, go to the [Box.com page on O2](#).

Prior to graduation, students/interns must develop a plan to transfer all important documents, information, and/or data to the appropriate OHSU faculty or research mentor as all student Box accounts are closed after graduation.

REMOVABLE STORAGE DEVICES (E.G., THUMB DRIVES AND EXTERNAL HARD DRIVES)

Removable storage devices, such as USB sticks (thumb drives) and external hard drives, must be encrypted with Dell Data Protection if they contain restricted information (see the *Protecting restricted information* section).

The Dell Data Protection software is required for computers that need access to internal resources on the secure network. It ensures that restricted information cannot be moved from the secure network to unencrypted removable storage devices. In addition, it can be used to encrypt unencrypted removable storage devices.

To learn more, go to the [Dell Data Protection page on O2](#).

ADDITIONAL RESOURCES

- [Help and How To](#): Help and How To provides solutions for the most common information technology issues at OHSU, as well as FAQ on a variety of topics.

PROTECTING RESTRICTED INFORMATION

Students/interns are responsible for protecting all restricted information that they come across at OHSU. Restricted information is anything that is not meant for the public, such as information about patients, employees or students, and research data. Often, it is protected by federal regulations. For example, Protected Health Information (PHI) is protected by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

TEXT MESSAGES

Do **not** use mobile devices, such as smartphones, to text PHI. Mobile devices that are used to receive OHSU pages can and should be encrypted. Follow these instructions to encrypt an [iOS](#) or [Android](#) device. Note that these steps encrypt the **device** — not the pages it receives. Therefore, the following additional precautions should be taken:

- Limit PHI to the minimum necessary for effective patient care.
- Change smartphone settings so that the “preview” does not display on the locked screen. If preview is set to “on” then any patient information sent may be viewable without authentication.
- Delete pages containing patient information after reading them.

PHOTOS AND VIDEOS

- Photos and videos of patients for personal purposes are not permitted.
- If photos are being taken for education purposes, the patient must sign a release prior to being photographed.
- If photos are being taken for treatment purposes, the photos must be incorporated into the patient's chart in Epic.
- If photos or video of students/interns are being used for educational, informational and/or promotional purposes, the student/intern must have signed a release before the media is used.

ADDITIONAL TIPS

- Do not include any identifying patient information in written history and physicals (H&Ps).
- Never send patient information to personal email accounts (e.g., Gmail, Hotmail).
- Only access the electronic health records of patients for whom the student/intern are directly providing care. Do not access the records of family members or friends.

Be aware that failure to comply with HIPAA regulations may result in serious consequences, up to and including dismissal from OHSU.

For questions about protecting restricted information, including PHI, contact the Information Privacy and Security Office at 503-494-0219 or oips@ohsu.edu.

STUDENT GRIEVANCES

Students/interns have the right to grieve matters related but not restricted to the following areas: rights of authorship on scientific publications, student/mentor relationships, laboratory safety concerns, and grading policies. Students/interns may not grieve disciplinary action, grades (including failure of the qualifying exam or failure of the oral thesis/dissertation exam), dismissal or other action taken under the Professional Conduct Policy. Steps for filing a grievance, including recourse to an administrator other than the GPHN Program Director, can be found in the [Graduate Council By-Laws](#).

Complaints related to supervised practice should first be addressed with the preceptor. If unable to resolve the issue with the preceptor, the student/intern should contact the GPHN Program Director or Associate DI Director.

Whether the grievance occurs in a didactic course or supervised practice, retaliation is not permitted by any of the parties: GPHN Program Director, Associate DI Director, other faculty or staff, student/intern, or preceptor.

Students/interns in the DI and MSDI may submit complaints directly to ACEND only after all other options with the program and institution have been exhausted. Note that ACEND will investigate only signed allegations that the program is not in compliance with accreditation standards or policies. Information about filing a complaint with ACEND against an accredited program can be found online. ACEND can be reached at:

Online: <http://www.eatrightpro.org/resources/acend>

Email: ACEND@eatright.org

Phone: 800/877-1600, ext. 5400

Mail: 120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995

ALUMNI

The GPHN tries to cultivate relationships with our graduates to further job leads, recruit preceptors for our program, gain mentors for community outreach projects, or any other opportunities that become available. Plus, we like to celebrate the accomplishments of our graduates! We ask that graduates keep us apprised of their current email address and, when the time comes, take a moment to respond to our brief electronic alumni survey.

ALUMNI SURVEYS

As part of our ACEND accreditation we are required to send out surveys at the one, three, and five year mark following graduation. Responses from alumni help us evaluate the effectiveness of our program, how it prepares our graduates for the RDN exam, and gives us an idea of our graduates' employment prospects after they leave the GPHN. Without these surveys, we cannot make adjustments that continually improve our program and put our graduates in a more competitive position.

PROGRAM OVERVIEWS

DIETETIC INTERNSHIP GRADUATE CERTIFICATE

MISSION

The Dietetic Internship Graduate Certificate (DI) program prepares graduates to deliver evidence-based nutrition care and dietetics services to improve the health of Oregonians and individuals living throughout the United States. We foster the pursuit of excellence in dietetic interns through the provision of a wide array of experiences in professional leadership and practice to be carried forward into their careers as Registered Dietitian Nutritionists.

LEARNING OBJECTIVES

The learning objectives of the dietetic internship graduate certificate track mirror the core competencies specified in the 2017 ACEND standards for dietetic internship programs. Program goals and objectives are available on the [GPHN website](#).

REQUIRED COURSES

NUTN 500 Community Outreach	2 credits
NUTN 504 Supervised Practice	21 credits
NUTN 510 Public Health Nutrition	3 credits
NUTN 511 Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 512 Advanced Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 513 Food Service and Clinical Management	2 credits
NUTN 514 Nutrition Research and Scientific Communication	3 credits
NUTN 515 Case Studies in Advanced Medical Nutrition Therapy	2 credits
TOTAL	39 Credits[#]

[#]Students are required to take IPE 501 Foundations of Patient Safety and Interprofessional Practice for one credit if offered by OHSU.

AREA OF CONCENTRATION

In 2012, ACEND began requiring all dietetic internships to select a unique concentration that would enrich its curriculum and set it apart from other internship programs. The GPHN chose a concentration in Community Outreach because it directly reflects the mission of OHSU and inspires our students/interns to build bridges between the classroom, clinic, and community. Our dietetic internship provides a greater number of supervised practice hours in clinical nutrition than any other area of dietetic practice, which appeals to students/interns seeking a strong focus on clinical nutrition knowledge and skills. With the addition of our concentration in Community Outreach, students/interns are also able to enhance their skills in leadership, interdisciplinary teamwork, and communication while engaging with a community-based program. Our concentration in Community Outreach builds upon several of ACEND's required Professional Practice competencies, including the following:

- CRDN 1.1: Select indicators of program quality and/or customer service and measure achievement of objectives.
- CRDN 1.3: Justify programs, products, services and care using appropriate evidence or data.
- CRDN 2.2: Demonstrate professional writing skills in preparing professional communications.
- CRDN 2.3: Demonstrate active participation, teamwork and contributions in group settings.
- CRDN 2.7: Apply leadership skills to achieve desired outcomes.
- CRDN 2.9: Participate in professional and community organizations.
- CRDN 3.3: Demonstrate effective communications skills for clinical and customer services in a variety of formats and settings.
- CRDN 3.7: Develop and deliver products, programs or services that promote consumer health, wellness and lifestyle management.
- CRDN 4.8: Develop a plan to provide or develop a product, program or service that includes a budget, staffing needs, equipment and supplies.

Our concentration in Community Outreach also fulfills the following concentration-specific competencies:

1. *Identify a specific community need(s) involving food and nutrition, set the goals and objectives, and integrate all required parties to carry out the project or activity.*
2. *Execute and then assess the effectiveness and impact of the community-focused project or activity.*

SUPERVISED PRACTICE – NUTN 504

Supervised practice rotations encompass the work students/interns do at a wide variety of rotation sites throughout the program. The DI Director and Associate DI Director of the Internship monitor students'/interns' progress in this course based on evaluations received from preceptors, including both the student's/intern's ability to meet ACEND competencies and professional characteristics; on professional portfolio materials; and other assigned projects. Rotations generally occur Tuesday through Friday of each week for a minimum of 32 hours per week, and schedules are finalized after the respective preceptors confirm their scheduled rotations. The preceptor(s) specify the start and anticipated end time for each day of a rotation, as well as the desired location to check-in each day. Preceptor contact sheets are provided during orientation, and are posted on the NUTN 504 Sakai site.

Due to the fast-paced and dynamic nature of the internship, we advise against regularly scheduled employment during this 11-month period of time.

AFFILIATED PRACTICE SITES

The OHSU Dietetic Internship Program maintains affiliation agreements with most major hospitals, clinics and nutrition-related programs in Portland and beyond. A list of major clinical sites that frequently accept and host OHSU dietetic students/interns for supervised practice rotations, follows:

- OHSU Hospital and Doernbecher Children's Hospital
- VA Portland Health Care System (VAPORHCS, both Portland and Vancouver campuses)
- Legacy Emanuel Medical Center and Randall Children's Hospital

- Providence (St. Vincent, Portland and Medford)
- Adventist Medical Center (Portland)
- Kaiser Medical Center (Portland, Sunnyside and Westside)
- Asante (Three Rivers Medical Center and Rogue Regional Medical Center, Medford area)
- VA Southern Oregon Rehabilitation Center and Clinics (VA SORCC, Medford area)
- St. Charles Medical Center and affiliated hospitals (Bend, OR)
- PeaceHealth Southwest Medical Center (Vancouver, WA)

In addition, the program maintains affiliation agreements with multiple state agencies, non-profit organizations, corporations, and educational institutions in order to provide an array of supervised practice opportunities in public health, community nutrition, nutrition education, food service, management, and patient care.

While OHSU and the GPHN have extensive matriculation requirements, additional background checks, drug tests, fingerprinting, etc. may be required by other supervised practice sites. Any costs not covered by the supervised practice sites will be the responsibility of the student/intern. These additional requirements may take two to three weeks or longer to complete, so advance planning is required.

COMPARISON OF SUPERVISED PRACTICE AND COMMUNITY OUTREACH

Supervised Practice: All dietetic internship programs that are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) must provide students/interns with a minimum of 1,200 hours of supervised practice or as specified under extenuating circumstances. ACEND defines supervised practice as planned learning experiences (including activities in professional work settings and alternate supervised experiences such as simulation, case studies and role playing) in which students/interns perform tasks to demonstrate mastery of ACEND competencies. Learning activities performed by students/interns that are not typically performed as part of the preceptor's work responsibilities, such as writing papers, completing a study guide or other homework, should not be counted towards fulfilling supervised practice hours in professional work settings.

Community Outreach: ACEND requires all dietetic internship programs to select at least one unique "concentration." A concentration is an area of program focus, within the context of the mission and goals of the program, which builds on the core knowledge and competencies and begins to develop additional depth necessary for future proficiency in a particular area. We chose a concentration in Community Outreach to honor OHSU's mission, enrich our curriculum, and build bridges between the classroom and community. Our students/interns work with vulnerable populations, translating science to service.

SIMILARITIES

Each student/intern works individually or in a small team to serve a community partner organization through community outreach work. To be effective, students/interns must understand the mission, vision, and goals of their partner organization. To help students/interns become familiar with their partner organization, we try to place them in a supervised practice rotation at the same organization. If the community outreach organization cannot provide a supervised practice rotation for all students/interns on the team, we arrange rotations with similar or complimentary sites to give them this experience.

DIFFERENCES

	Supervised Practice Rotations	Community Outreach
Primary Purpose	Demonstrate attainment of ACEND core competencies; complete at least 1,200 hours in a variety of practice settings	Fulfill a community partner's food or nutrition need through the development and implementation of community-based work
Structure	Individualized; 1:1 or 2:1 student/intern to preceptor ratio	Individualized or in groups of 2-4 students/interns who work with one mentor
Duration	Rotations range from 2-6 weeks in length; minimum of 32 hours per week throughout the 11 month program	Variable time over the 11 month program for Dis and during the 2 nd year for MSDIs
Evaluation	Students/interns are evaluated by preceptors using the program's evaluation forms at the end of every rotation	Students/interns complete reflection papers, peer evaluations based on their agreed upon division of labor; mentor and course instructor evaluations
Course Title	NUTN 504: Supervised Practice Rotations	NUTN 500: Community Outreach
Contact Person	Dr. Stadler (stadlerd@ohsu.edu) GPHN and DI Director and Joanna Cummings (cummijoa@ohsu.edu) Associate DI Director	Carol DeFrancesco (defrance@ohsu.edu), GPHN Instructor and Community Outreach Coordinator

COMBINED MASTER OF SCIENCE IN HUMAN NUTRITION/DIETETIC INTERNSHIP

MISSION

The combined Master of Science in Human Nutrition/Dietetic Internship (MSDI), prepares graduates to deliver evidence-based nutrition care and dietetics services to improve the health of Oregonians and individuals living throughout the United States. We foster the pursuit of excellence in dietetic interns through the provision of a wide array of experiences in professional leadership and practice to be carried forward into their careers as Registered Dietitian Nutritionists.

LEARNING OBJECTIVES

The learning objectives of the MSDI program mirror the core competencies specified in the 2017 ACEND standards for dietetic internship programs. Graduates of the MSDI program will also be able to:

1. Apply their advanced knowledge of nutrient metabolism to explain relationships between nutrient intake, indicators of nutritional status, and health and disease.
2. Utilize the Nutrition Physical Examination to identify physical signs and symptoms of nutrition-related disease in patients and communicate these findings to the healthcare team using the Nutrition Care Process.
3. Perform a thorough review of the nutrition-related scientific literature using library resources, evidence-based guidelines, systematic reviews and other peer-reviewed material and critically analyze this material for scientific merit.
4. Develop a project to answer a nutrition-related question: including problem identification, a review of existing literature, collection of data or conduction of a project, analysis of results and statement of conclusion.
5. Disseminate research results or other scholarly work about nutrition-related topics to scientists, health care professionals and members of the general public using poster, oral presentation, and written formats.
6. Communicate effectively with clients, patients, peers, mentors, and collaborators in a professional and ethical manner that fosters a constructive and collaborative working environmental for all.

Program goals and objectives are available on the [GPHN website](#).

REQUIRED COURSES – THESIS OPTION

NUTN 500 Community Outreach Projects	2 credits
NUTN 503 Thesis	6 credits, minimum
NUTN 504 Supervised Practice Rotations	21 credits
NUTN 505 Reading & Conferences	1 credits
NUTN 507 Seminar	1 credits
NUTN 510 Public Health Nutrition	3 credits
NUTN 511 Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 512 Advanced Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 513 Food Service and Clinical Management	2 credits

NUTN 514 Nutrition Research and Scientific Communication	3 credits
NUTN 515 Case Studies in Advanced Medical Nutrition Therapy	2 credits
NUTN 516 Nutrition Physical Examination and Lab	3 credits
NUTN 517 Laboratory Methods in Nutrition	3 credits
NUTN 521 Energy Metabolism	3 credits
NUTN 522 Antioxidant, Bone, and Protein Metabolism	3 credits
NUTN 527 Nutritional Epidemiology	2 credits
BSTA 525 Introduction to Biostatistics	4 credits
PHYS 510A Advanced Physiology	6 credits
Electives	11 credits, minimum
TOTAL	82 credits, minimum[#]

[#]Students are required to take IPE 501 Foundations of Patient Safety and Interprofessional Practice for one credit if offered by OHSU.

REQUIRED COURSES – CAPSTONE OPTION

NUTN 500 Community Outreach Projects	2 credits
NUTN 506 Capstone	6 credits, minimum
NUTN 504 Supervised Practice Rotations	21 credits
NUTN 505 Reading & Conferences	1 credits
NUTN 507 Seminar	1 credits
NUTN 510 Public Health Nutrition	3 credits
NUTN 511 Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 512 Advanced Pathophysiology and Medical Nutrition Therapy	3 credits
NUTN 513 Food Service and Clinical Management	2 credits
NUTN 514 Nutrition Research and Scientific Communication	3 credits
NUTN 515 Case Studies in Advanced Medical Nutrition Therapy	2 credits
NUTN 516 Nutrition Physical Examination and Lab	3 credits
NUTN 521 Energy Metabolism	3 credits
NUTN 522 Antioxidant, Bone, and Protein Metabolism	3 credits
NUTN 527 Nutritional Epidemiology	2 credits
BSTA 525 Introduction to Biostatistics	4 credits
PHYS 510 Advanced Physiology	6 credits
Electives	14 credits, minimum
TOTAL	82 credits, minimum[#]

[#]Students are required to take IPE 501 Foundations of Patient Safety and Interprofessional Practice for one credit if offered by OHSU.

ELECTIVES

Three of the required elective credits can be taken outside the GPHN. A maximum of three independent study credits may be used towards required elective credits. Laboratory Methods in Nutrition (NUTN 517) may be taken by capstone students as a standard elective. Students must discuss their course of study and elective options with their primary mentor and academic advisor.

THESIS

A thesis project is an independent research project that should answer a question that contributes to new knowledge in the field of nutrition and dietetics and is applicable beyond the single setting. It represents a scholarly effort of high quality, and is an academic-focused research project with broader applicability. The thesis project clearly states a problem or issue to be addressed. It involves a review of the existing literature, collection of data or conduction of a project, analysis of results, and statement of conclusion.

CAPSTONE

A capstone is an independent project that will be performed under the close supervision of a capstone project mentor. A capstone project addresses a specific need, and has a direct, practical application to a clinical practice group, community organization, public health agency, etc.; includes specific activities and/or action items with clear endpoints, and a written deliverable. A capstone project must go beyond an experience to create a new product as stated above; and is novel, at least in application to your specific population. A capstone project includes a literature review that will help you identify prior work. Project possibilities include, but are not limited to developing or implementing a nutrition education program, developing a new educational and/or assessment tool, outcome-based assessment of a nutrition intervention, developing a new educational curriculum, or developing evidence-based clinical practice guidelines.

.

MASTER OF SCIENCE IN HUMAN NUTRITION

This degree track is for those who either have the RDN credential or who are eligible to sit for the RDN exam.

MISSION

The Master of Science in Human Nutrition Program prepares students to apply advanced nutrition assessment techniques to diagnose and monitor nutrition-related conditions, to conduct nutrition-related research and program assessment, to translate and integrate nutrition research findings in to practice, and to advance the field of nutrition in clinical, community, management, and research areas of practice.

LEARNING OBJECTIVES

After completing the MSHN, students will be able to:

1. Apply their advanced knowledge of nutrient metabolism to explain relationships between nutrient intake, indicators of nutritional status, and health and disease.
2. Utilize the Nutrition Physical Examination to identify physical signs and symptoms of nutrition-related disease in patients and communicate these findings to the healthcare team using the Nutrition Care Process.
3. Perform a thorough review of the nutrition-related scientific literature using library resources, evidence-based guidelines, systematic reviews and other peer-reviewed material and critically analyze this material for scientific merit.
4. Develop a project to answer a nutrition-related question: including problem identification, a review of existing literature, collection of data or conduction of a project, analysis of results and statement of conclusion.
5. Disseminate research results or other scholarly work about nutrition-related topics to scientists, health care professionals and members of the general public using poster, oral presentation, and written formats.
6. Communicate effectively with clients, patients, peers, mentors, and collaborators in a professional and ethical manner that fosters a constructive and collaborative working environmental for all.

REQUIRED COURSES – THESIS OPTION

NUTN 503 Thesis	6 credits, minimum
NUTN 505 Reading & Conferences	1 credits
NUTN 507 Seminar	1 credits
NUTN 514 Nutrition Research and Scientific Communication*	3 credits
NUTN 517 Laboratory Methods in Nutrition	3 credits
NUTN 521 Energy Metabolism	3 credits
NUTN 522 Antioxidant, Bone, and Protein Metabolism	3 credits
NUTN 527 Nutritional Epidemiology	2 credits
NUTN 5XX Cultural Foods^	2 credits
BSTA 525 Introduction to Biostatistics	4 credits
PHYS 510 Advanced Physiology	6 credits
Electives	11 credits, minimum

TOTAL**45 credits, minimum[#]**

*OHSU Dietetic Internship graduates entering the MS program will have credits obtained for 514 counted towards their MS degree. Depending on research experience and educational background, students coming to the program from outside OHSU may be required to take 514, per the discretion of the Program Director and Master's Program Director

^Courses required for all students in master's degree program only, without the dietetic internship. Applicants who already hold registered dietitian credential or who have completed a DPD can apply to have course requirement waived but two additional elective credits will be required in lieu of course. For students who completed their internship at OHSU, NUTN 515 will be substituted for this course.

[#]Students may be required to take IPE 501 Foundations of Patient Safety and Interprofessional Practice for one credit if required by OHSU.

ELECTIVES

Three of the required elective credits can be taken outside the GPHN. A maximum of three independent study credits may be used towards required elective credits. Laboratory Methods in Nutrition (NUTN 517) may be taken by capstone students as a standard elective. NUTN 516A/B (Nutrition Physical Exam) is required for all students in the MSDI programs, and can be taken as an elective for students in the master's program only. Students must discuss their course of study and elective options with their primary mentor and academic advisor.

REGENCY OF EDUCATION

Students must show successful completion of prerequisite coursework, or evidence of relevant professional experience, within the past five years. If the student needs to complete additional coursework in order to meet "recency of education" requirements, the actual requirements will be determined on an individual basis following discussion between the program director and potential applicant. Completion of recommended requirements does not guarantee acceptance into the program.

THESIS

A thesis project is an independent research project that should answer a question that contributes to new knowledge in the field of nutrition and dietetics and is applicable beyond the single setting. It represents a scholarly effort of high quality, and is an academic-focused research project with broader applicability. The thesis project clearly states a problem or issue to be addressed. It involves a review of the existing literature, collection of data or conduct of a project, analysis of results, and statement of conclusion.

CAPSTONE

A capstone is an independent project that will be performed under the close supervision of a capstone project mentor. A capstone project addresses a specific need, and has a direct, practical application to a clinical practice group, community organization, public health agency, etc.; includes specific activities and/or action items with clear endpoints, and a written deliverable. A capstone project must go beyond an experience to create a new product as stated above; and is novel, at least in application to your specific population. A capstone project includes a literature review that will help you identify prior work. Project possibilities include, but are not limited to developing or implementing a nutrition education program, developing a new educational and/or assessment tool, outcome-based assessment of a nutrition intervention, developing a new educational curriculum, or developing evidence-based clinical practice guidelines.

APPENDICES

APPENDIX A: COURSE DESCRIPTIONS

The following table shows the planned course offerings for the 2020-2021 academic year. Courses are subject to change. **BOLD** indicates courses for the Dietetic Internship; **STARRED** courses are electives. NUTN 503 (Thesis credits) or NUTN 506 (Capstone credits) may be taken any term in which thesis or capstone work is conducted.

Summer 2020		Fall 2020	Winter 2021	Spring 2021

				NUTN 540*

NUTN 500 – COMMUNITY OUTREACH PROJECTS

2 credits

Instructor: Carol DeFrancesco, MALS, RD, LD

Topic/format: Our students/interns work with vulnerable populations, translating science to service.

NUTN 502 – INDEPENDENT STUDY

Credits variable, all terms

Instructor: Varies

Topic to be determined by student's/intern's course of study

NUTN 504 – SUPERVISED PRACTICE ROTATIONS

Credits: 4, summer term; 5-6 credits per term, fall/winter/spring terms

Instructor: Diane Stadler, PhD, RD, LD; Joanna Cummings, MS, RD, CNSC

Supervised Practice provides students/interns with experience in community nutrition, food service management, clinical nutrition, and advanced practice settings. Students/interns practice and apply principles and skills in dietetics and nutrition to real situations under the guidance of professionals in the field. Student choice rotations take place in spring term. Evaluations by preceptors follow competencies defined by the Accreditation Council for Education in Nutrition and Dietetics. Supervised Practice occurs during summer and fall terms for public health and community nutrition, and food service management; winter and spring terms focus on clinical rotations and clinical

staff experience. Students/interns are required to complete a minimum of 1,200 hours of supervised practice over the course of the program.

NUTN 505 – READING AND CONFERENCE

1 credit

Instructor: Sandy van Calcar, PhD, RD, LD

A professional book club series is sponsored each year for students/interns of the GPHN, faculty, preceptors and members of the community. Three nutrition-related books are read and discussed. Books selected for discussion provide a balanced depiction of a nutrition-policy issue, a nutrition-ethics issue, and/or a nutrition-history or current nutrition trend. Students/interns enrolled in this course work in small groups to host one of the book club discussions by preparing a list of discussion questions, designing an informative flyer to announce the book and the session, marketing the discussions sessions to interested parties, inviting guest speakers and introducing the topic.

NUTN 507 – SEMINAR

1 credit, winter term

Instructor: TBD

Each seminar series is centered on a nutrition-related theme and provides students/interns an opportunity to use traditional methods to present an evidenced-based review of a related topic. Students/interns write an abstract, develop learning objectives, and give an oral presentation of their topic using PowerPoint or another visual media platform. In addition, each student/intern hosts one of the presentations and provides peer editing of each abstract, peer critique of each presentation, and actively participates in each discussion.

NUTN 510 – PUBLIC HEALTH NUTRITION

3 credits, fall term

Instructor: Joanna Cummings, MS, RD, CNSC

This course provides an overview of public health nutrition, including a discussion of the social determinants of health, hunger and food insecurity, health literacy, cross cultural awareness, and more. Content includes nutrition public policy and nutrition assistance programs aimed at improving public health. The course also explores best practices in nutrition education and counseling. Students/interns work in small teams to prepare an annotated bibliography and oral presentation on food and nutrition needs, concerns, and resources for a particular phase of the lifespan.

NUTN 511 – PATHOPHYSIOLOGY AND MEDICAL NUTRITION THERAPY

3 credits, winter term

Instructor: Julie McGuire, MS, RDN, LD

This course provides an overview of the pathophysiology of common chronic diseases and disorders, and the application of medical nutrition therapy. Topics may include nutrition physical exam, diabetes, cardiovascular disorders, disorders of the upper and lower GI, and neonatal and pediatric nutrition therapy. In this series of classes, a number of speakers will share their areas of expertise by serving as guest lecturers. The course will be composed of formal lecture, small group activities, and facilitated discussions.

NUTN 512 – ADVANCED PATHOPHYSIOLOGY AND MEDICAL NUTRITION THERAPY

3 credits, spring term

Instructor: Julie McGuire, MS, RDN, LD

This course builds upon the nutrition fundamentals covered in NUTN 511 while focusing on more complex conditions such as metabolic disorders, trauma, burns, oncology, and organ transplantation.

NUTN 513 A/B – FOOD SERVICE AND CLINICAL MANAGEMENT

2 credits, summer (A)/fall terms (B)

Instructor: Bert Connell, PhD, RD, LD, FAND

This course is designed to provide students/interns with strategic application of principles of Food Service and Clinical Management. It will be primarily focused on the areas of finance (with the creation of a budget), human resources (through critical incident and role play), sustainability (through guest lectures and discussion), communication strategies (through email and other media), and needs assessment (through critical incident and role play). As a term project, students/interns will complete a feasibility study for a product, program, or service.

NUTN 514 A/B – NUTRITION RESEARCH AND SCIENTIFIC COMMUNICATION

3 credits, winter(B)/spring terms(A)

Instructors: Melanie Gillingham, PhD, RD, LD

The Nutrition Research course is a three credit hour course that provides an introduction to nutrition-based research including discussions of different types of research designs and their strengths and limitations, developing a nutrition-related research question, conducting a critical review of the literature related to the research question, developing a proposal to answer the research question, carrying out the proposed research, and disseminating the research results through poster and oral presentations. Students/interns work in teams to design, conduct, and summarize the results of a research project centered on NHANES cross-sectional data.

NUTN 515 – CASE STUDIES IN ADVANCED MEDICAL NUTRITION THERAPY

2 credits, spring term

Instructor: TBD

Students/interns research and present a case study that demonstrates the nutrition care process for a chosen disease with nutrition implications. Students/interns select a patient during supervised practice and develop a case

study presentation using evidence-based guidelines, incorporating pathophysiology, nutrition assessment, diagnosis, intervention, monitoring, and evaluation.

NUTN 516 A/B – NUTRITION PHYSICAL EXAMINATION & LAB

3 credits (Lecture 2, Lab 1), spring term

Instructor: Julie McGuire, MS, RDN, LD

The nutrition-focused physical exam (NFPE) is presented as an integral part of the Nutrition Care Process and Model (NCPM). Findings of the NFPE are considered in the context of other nutrition assessment information, including biochemical data, food/nutrition-related history, anthropometric measurements, and client history. Cases seen during weekly round sessions at the OHSU Hospital provide the clinical context for classroom discussions.

NUTN 517 – LABORATORY METHODS IN NUTRITION

3 credits, fall Term

Instructor: Melanie Gillingham, PhD, RD, LD

This course provides a conceptual framework and hands on lab experience to explore the basic nutritional assessment techniques used in dietetics/nutrition practice. Assessment techniques for measuring diet, blood glucose, insulin, plasma lipids, mineral and vitamin status are reviewed and practiced in the laboratory setting. Students/interns evaluate the effect of changes in diet on blood parameters such as glucose, insulin and lipids. Additional techniques to assess body composition and energy expenditure are included in the laboratory procedures. At the end of this course, students/interns have a working knowledge of the basic nutrition assessment principles and laboratory procedures used to assess nutrition status of patients or research subjects.

NUTN 521 – ENERGY METABOLISM

3 credits, summer term

Instructor: Sandy van Calcar, PhD, RD, LD

This course reviews biochemical processes and nutrients involved in energy production. The digestion, absorption, transport, storage and metabolism of carbohydrates and lipids are covered in depth. Micronutrients essential to these systems including many B vitamins, and minerals are covered as they relate to energy production. At the end of the quarter, perturbations in energy balance during various states of health and disease are discussed. These topics include energy balance during exercise, in obesity or during critical illness.

NUTN 522 – ANTIOXIDANT, BONE, AND PROTEIN METABOLISM

3 credits, fall term

Instructor: Joyanna Hansen, PhD, RD, LD

NUTN 522 is organized into three main sections, which include protein structure, function and metabolism, nutrient effects on bone and antioxidant roles of various nutrients. Specific nutrients of study include protein, the fat soluble vitamins, vitamin B6 and biotin, as well as key macro- and micro-minerals, including calcium, magnesium, zinc, selenium, copper, boron, manganese and molybdenum.

NUTN 527/627 – NUTRITIONAL EPIDEMIOLOGY

2 credits, spring term of odd years

Instructor: Joyanna Hansen, PhD, RD, LD

Nutritional Epidemiology is designed to introduce basic concepts and methods in epidemiology and nutritional epidemiology. This course focuses on considerations related to the design, analysis, and interpretation of population-based nutrition studies. Topics will include methods for assessing dietary intake, adjustment for energy intake, use of biomarkers in nutrition-related studies, methodological challenges in nutritional epidemiology research, and the application of nutritional epidemiology research to health policy.

NUTN 530 – MATERNAL, INFANT, AND CHILD NUTRITION

3 credits, winter term of odd years

Instructor: Sandy van Calcar, PhD, RD, LD

Maternal, Infant and Child Nutrition will cover nutritional needs and concerns for pregnant women, the developing fetus, infants and children through adolescence. The course will include several guest lectures from clinicians and researchers in this field. Topics will include: pregnancy physiology, nutrition needs during pregnancy, fetal growth and metabolism and nutrition-related pregnancy complications; nutrition for the first year including lactation, breast milk vs. infant formula composition, formula selection, growth assessment, infant feeding recommendations and maternal/infant feeding relationship; growth and nutrition needs for toddlers and preschool including nutrition-related problems during these years; growth and nutrition needs for older children and adolescents including bone health, fad diets, sports nutrition and eating disorders; and medical nutrition therapy for pediatrics including inborn errors of metabolism, seizure control, renal disease, eating disorders, diabetes, cystic fibrosis, other nutrition related disorders.

NUTN 531 – SPORTS NUTRITION

2 credits, fall term of odd years

Instructor: Carol DeFrancesco, MALS, RDN, LD

This course will explore the metabolism of nutrients and nutritional needs for optimal human performance; specific recommendations for training and competition, and dietary guidelines for active individuals. Discussions will include current research findings concerning energy metabolism, fluid and electrolyte balance, vitamin-mineral supplementation, use of ergogenic aids, and exercise in extreme environments.

NUTN 532 – NUTRITION FOR THE OLDER ADULT

2 credits, winter term of even years

Instructor: Sandy van Calcar, PhD, RD, LD

Nutrition for the Older Adult will address the aging process and its impact on nutritional needs of the elderly. The course will include several guest lectures from clinicians and researchers in this field. Topics include the physiology of the aging process, with emphasis on how physical and mental changes impact nutrition needs of the elderly population, assessing nutrition status of the elderly and developing medical nutrition therapy plans for this group, food insecurity in the elderly population and available nutrition programs and resources, prevention and treatment of osteoporosis and other skeletal health concerns, role of physical activity in the aging process and exercise programs for the elderly, nutrition and aging research including calorie restriction and microbiome studies, and end-of-Life care, with emphasis on providing and withdrawing nutrition support.

NUTN 534/634 – MOTIVATIONAL INTERVIEWING FOR HEALTH CARE PROFESSIONALS

2 credits, winter term

Instructor: Carol DeFrancesco, MALS, RDN, LD

In this two-credit course students will learn the theoretical and empirical tenets of Motivational Interviewing and practice the clinical skills necessary to use this approach in health care settings. Motivational interviewing is a collaborative conversation, goal-oriented style of communication with particular attention to the language of change. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person's own reasons for change within an atmosphere of acceptance and compassion. At the completion of the course, students will be able to demonstrate the ability to use motivational interviewing strategies to promote health behavior change.

NUTN 535– ONCOLOGY NUTRITION

2 credits, fall term of even years

Instructor: Julie McGuire, MS, RDN, LD

This two credit elective will explore the relationship between nutrition and cancer prevention, treatment and survivorship. Discussions will focus on current research in oncology nutrition, and providence guidance for clinical practice.

NUTN 537 – SPORTS NUTRITION PRACTICUM

1 credit, TBD

Instructor: TBD

This course is designed to facilitate the development of clinical skills in providing nutrition care to collegiate athletes. The course will primarily serve as a practicum in which the student will provide nutrition counseling for athletes for two to three hours per week, and allow the opportunity for students to continue to develop documentation skills of services provided.

NUTN 538 – GLOBAL NUTRITION

2 credits, summer term

Instructor: Joanna Cummings, MS, RD, CNSC

This course introduces the student to nutrition in a globalized world. The purpose of this course is to familiarize the student with 1) Existing and emerging issues in global nutrition that influences health, survival, and development capacity of people in developing societies, 2) approaches to improving nutritional well-being and knowledge in diverse populations. The course focuses on distribution and determinants of nutrition which has direct impacts on both over and under nutrition. The subsequent modules will cover Nutrition & Social Determinants, Micronutrient Deficiencies, Nutrition in Communicable and Non-Communicable Disease (NCD), Nutrition Interventions, Policy, Research Methods and Tools, Basic Techniques of Anthropometric Assessments and Preparing for International Work. An introductory course in human nutrition is required for this course. Supplemental readings will be provided. This course is offered online and consists of a mix of didactic lectures, guest speakers, student projects and videos.

NUTN 540 – SUSTAINABLE AND EQUALITABLE FOOD SYSTEMS

2 credits, spring term

Instructor: Sean Gillon, PhD

Surveys the interdisciplinary field of food systems, providing an overview of the historical development of food systems, focusing on factors that determine opportunities and outcomes in terms of health, equity, sustainability, and access. Explores contemporary issues and approaches in food systems policy and practice, considering criteria, principles, and strategies for the development of sustainable and equitable food systems. Key issues explored include food policy, food insecurity, urban food environments, alternative food initiatives, and perspectives on food systems change. Students in the course consider and contextualize nutritionally-focused interventions and outcomes in terms of food systems' social dimensions.
