# Service to Oregon and beyond

FOUNDED IN 1887, THE OHSU SCHOOL OF MEDICINE HAS AN ENDURING COMMITMENT TO EXCELLENCE ACROSS MISSIONS.

We innovate to prepare learners to advance health across and within populations. We seek to understand the origins of disease, fueling the development of life-changing therapies. And we care for patients and collaborate with providers in communities across the state, expanding access to cutting-edge practices through outreach, technology and partnership.

We do our work with confidence but also with the humility to realize what we don't know. We are seeking multiple perspectives and listening to more voices – including those of our learners – to tackle health disparities, better serve all people and improve the climate of inclusion, respect and wellness in our academic medicine community.

Committed to public service, we are guided by the needs of Oregonians, while sharing our knowledge and experience well beyond.

*Sharon Anderson*  
Sharon Anderson, M.D.  
Dean, OHSU School of Medicine

## Destination for transformational learning

We prepare more than 2,200 students and trainees for dynamic health care and biomedical research careers. Through innovative curricula and approaches, our educators train the next generation to lead in health and science.

30	Degree programs, including M.D., Ph.D., and master's, plus many certificate programs
85	Residency and fellowship graduate medical education programs
379	Continuing professional development activities statewide

[ohsu.edu/school-of-medicine/learn](https://ohsu.edu/school-of-medicine/learn)

## Engine of biomedical discovery

Our investigators pursue some of the biggest questions in biomedicine. Using state-of-the-art instrumentation and innovative approaches, researchers work together to discover new knowledge and therapies in a collaborative, supportive environment.

706	Externally funded researchers
\$379	Million in research funding
24th	In NIH funding among U.S. medical schools (2019 Blue Ridge Institute for Medical Research)

## Oregon's system for world-class care

OHSU Health clinicians are at the forefront of change and innovation. We focus on progress and collaboration to deliver world-class care that transforms the lives of patients.

2,177	OHSU Practice Plan (OPP) members
249	Specialties and subspecialties
\$761	Million in OPP patient care revenue
