communication BRIDGE
Speech Therapy Study

Who?
Individuals with a diagnosis of Primary Progressive Aphasia and their Communication Partners

Why?
To help us better understand the effects of speech language therapy on communication abilities in individuals with PPA

Where?
All components of the study take place remotely via video-conferencing

How Long?
Over the course of one year, participants in our study will be involved in:
• 5 evaluations with a certified speech language therapist
• 15 therapy sessions with a certified speech language therapist
• Exercises through our web-application

There are no costs to participate in this study. Compensation will be provided.
