Industry research sponsorship at OHSU aims to expand education into translational research in diabetes

Portland, OR, 1/5/2021 - The OHSU Department of Biomedical Engineering's recently formed Industrial Advisory Board is excited to announce that one of its inaugural industrial partners, DexCom, Inc. (Dexcom), headquartered in San Diego, CA, has recently entered into a sponsored research agreement with OHSU to fund a post-doctoral or graduate research scholar in Dr. Peter G. Jacobs' Artificial Intelligence for Medical Systems (AIMS) lab. The goal of this research sponsorship is to broaden educational opportunities for students interested in working in the area of translational research. Dexcom's 3-year funding of research activities at the AIMS lab is expected to lead to research and development of new technologies that can improve the lives of people living with diabetes.

About Oregon Health & Science University

Oregon Health & Science University is Oregon's only academic health center and is nationally distinguished as a research university dedicated solely to advancing health sciences. This allows us to focus on discoveries to prevent and cure disease, on education that prepares the health care and health science professionals of the future, and on patient care that incorporates the latest advances.

About Dexcom, Inc.

Dexcom, Inc. empowers people to take control of diabetes through innovative continuous glucose monitoring (CGM) systems. Headquartered in San Diego, California, Dexcom has emerged as a leader of diabetes care technology. By listening to the needs of users, caregivers, and providers, Dexcom simplifies and improves diabetes management around the world.
