

Dentistry (DMD-DENT)

Program: Dentistry (DMD-DENT)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

Communicate with patients/care givers to enable them to make informed decisions concerning the management of their care

Student Learning Outcome

Communicate case design to laboratory technicians and evaluate the resultant appliance or prosthesis.

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

Evaluate the patient response to treatment in the context of emerging trends in science health care, social determinants of health, and economics and apply this information to enhance patient care, practice management, professional development, and the needs of patient populations served.

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Evaluate scientific literature, and integrate new knowledge and best research outcomes with patient values and other sources of information to formulate a comprehensive treatment plan and alternatives that address each diagnosis.

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

Adhere to standard precautions for infection control for all clinical procedures.

Student Learning Outcome

Use patient education strategies to maximize oral health and the prevention of disease.

Student Learning Outcome

Select and administer or prescribe pharmacological agents in the treatment of dental patients with consideration of patient systemic health conditions and current medications.

Student Learning Outcome

*1 - Restore orofacial function, structure and esthetics while promoting soft and hard tissue health by preventing and/or managing:*a. Medical emergencies (e.g., cardiac arrest) b. Dental emergencies (e.g., acute pain, hemorrhage, trauma, and infection of the orofacial complex)c. Pain during treatmentd. Endodontic conditions, including pulpal and periradicular diseasese. Caries f. Periodontal diseases g. Oral mucosal and osseous diseases h. Restorative needs of the partially or completely edentulous patient i. Oral surgical treatment needs j. Developmental or acquired occlusal problemsk. Temporomandibular disorders l. Oral esthetic needs of patients m. Complications arising from the use of therapeutic and pharmacological agents in patient care

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

Provide oral health care in a manner that manages risk, ensures patient safety and is consistent with jurisprudence (e.g., OSHA and HIPAA) and ethical business and financial operations requirements for dentistry and healthcare.

Student Learning Outcome

Demonstrate a commitment to carrying out professional responsibilities, an adherence to ethical principles, and the qualities required to sustain lifelong personal and professional growth by evaluating outcomes of comprehensive dental care and personal level of skills and knowledge.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Demonstrate knowledge of pharmacology in the prevention, diagnosis and management of oral and systemic disease.

Student Learning Outcome

Formulate a comprehensive problem list

Student Learning Outcome

Recognize abuse and neglect (e.g. substance, physical, emotional and/potential self-abuse) and refer for appropriate management.

Student Learning Outcome

Describe the manifestations of systemic disease and the interrelationships with oral health, and how the disease and its management may affect the delivery of dental care.

Student Learning Outcome

Collect and interpret information from available resources (e.g. patient history, physical exam, diagnostic tools, patient records, and other healthcare professionals) to assess and manage patients.

Student Learning Outcome

Perform head and neck (extraoral and intraoral) and physical examinations within the scope of practice, interpreting and evaluating the clinical findings, recognizing the normal range of clinical presentation and distinguishing significant deviations that require monitoring, treatment, or management.

Student Learning Outcome

Identify the chief complaint, identify the contributing factors and complete a history of the present illness.

Student Learning Outcome

Demonstrate knowledge of sociology, psychology, ethics and other behavioral sciences.

Student Learning Outcome

Demonstrate knowledge of physics and chemistry to explain the characteristics of technologies and materials and how they are utilized.

Student Learning Outcome

Demonstrate knowledge of the biology of microorganisms in physiology and pathology, and of the cellular and molecular basis of host defense mechanisms.

Student Learning Outcome

Demonstrate knowledge of physics, chemistry, and molecular, cellular and systems-level scientific principles of development, structure, and function to explain normal biology and pathobiology.

Student Learning Outcome

Demonstrate knowledge of pathology as well as the principles of genetic, congenital, and developmental diseases and conditions and their clinical features to assess patient risk.

Student Learning Outcome

Demonstrate critical thinking, and understanding of quantitative methods and informatics, in the prevention, diagnosis and management of oral and systemic disease.

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

Collaborate with dental team members and other health care professionals to promote health and manage disease in communities.

Student Learning Outcome

Practice within the general dentist's scope of competence and consult with or refer to professional colleagues when indicated.

Program: Endodontics (DCRT-ENDO)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

3.3, Communicate effectively with individuals from diverse populations.

Student Learning Outcome

3.3, Communicate effectively with individuals from diverse populations.

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.3, Evaluate and integrate best research outcomes with clinical expertise and patient values for evidence-based practice.

Student Learning Outcome

1.3, Evaluate and integrate best research outcomes with clinical expertise and patient values for evidence-based practice.

Student Learning Outcome

1.4, Apply research principles to answer an original research question

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

6.3, Obtain and interpret patient/medical data, including a thorough intra/extraoral examination, and use these findings to accurately assess and manage all patients.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and periradicular origin.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and periradicular origin.

Student Learning Outcome

6.10, Manage endodontic procedures that preserve tooth structure, maintain function, and promote soft and hard tissue health.

Student Learning Outcome

6.3, Obtain and interpret patient/medical data, including a thorough intra/extraoral examination, and use these findings to accurately assess and manage all patients.

Student Learning Outcome

6.3, Obtain and interpret patient/medical data, including a thorough intra/extraoral examination, and use these findings to accurately assess and manage all patients.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and periradicular origin.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

6.9, Prevent, diagnose, and manage pain and anxiety in the dental patient.

Student Learning Outcome

6.10, Manage endodontic procedures that preserve tooth structure, maintain function, and promote soft and hard tissue health.

Student Learning Outcome

6.16, Recognize and manage substance abuse.

Student Learning Outcome

6.14, Prevent, recognize, and manage medical and dental emergencies.

Student Learning Outcome

6.9, Prevent, diagnose, and manage pain and anxiety in the dental patient.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

4.3, Recognize and appreciate the need to contribute to the improvement of oral health beyond those served in traditional practice settings.

Student Learning Outcome

3.2 Apply psychosocial and behavioral principles in patient-centered health care.

Student Learning Outcome

3.2 Apply psychosocial and behavioral principles in patient-centered health care.

Student Learning Outcome

6.8, Utilize universal infection control guidelines for all clinical procedures.

Student Learning Outcome

5.3, Apply principles of risk management, including informed consent and appropriate record keeping in patient care.

Student Learning Outcome

5.3, Apply principles of risk management, including informed consent and appropriate record keeping in patient care.

Student Learning Outcome

6.15, Recognize and manage patient abuse and/or neglect.

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

5.5, Demonstrate ability to conduct self-assessment, and use to set performance goals.

Student Learning Outcome

2.1, Apply ethical and legal standards in the provision of dental care.

Student Learning Outcome

2.2, Practice within one's scope of competence and consult with or refer to professional colleagues when indicated.

Student Learning Outcome

2.2, Practice within one's scope of competence and consult with or refer to professional colleagues when indicated.

Student Learning Outcome

2.1, Apply ethical and legal standards in the provision of dental care.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

Student Learning Outcome

5.1, Evaluate and apply contemporary and emerging information including clinical and practice management technology resources.

Student Learning Outcome

5.4, Demonstrate effective business financial management and human resource skills.

Student Learning Outcome

5.2, Evaluate and manage current models of oral health care management and delivery.

Student Learning Outcome

5.2, Evaluate and manage current models of oral health care management and delivery.

Student Learning Outcome

5.1, Evaluate and apply contemporary and emerging information including clinical and practice management technology resources.

Student Learning Outcome

6.6 Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.17, Diagnose, identify and manage oral mucosal and osseous diseases.

Student Learning Outcome

4.1, Provide prevention, intervention, and educational strategies.

Student Learning Outcome

6.4 Select obtain, and interpret diagnostic images for the individual patient.

Student Learning Outcome

6.6 Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.6 Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.4 Select obtain, and interpret diagnostic images for the individual patient.

Student Learning Outcome

1.2, Utilize critical thinking and problem-solving skills.

Student Learning Outcome

1.2, Utilize critical thinking and problem-solving skills.

Student Learning Outcome

6.6 Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

Student Learning Outcome

6.6 Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases

Student Learning Outcome

6.12, Diagnose and manage endodontic surgical treatment needs.

Student Learning Outcome

6.12, Diagnose and manage endodontic surgical treatment needs.

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

3.4, Communicate endodontic skills and endodontic scope of practice effectively to your dental professionals and professional colleagues

Student Learning Outcome

4.2, Participate with dental team members and other health care professionals in the management and health promotion of all patients.

Student Learning Outcome

3.4, Communicate endodontic skills and endodontic scope of practice effectively to your dental professionals and professional colleagues

Program: Endodontics (DMS-ENDO)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

Student Learning Outcome

3.1, Apply appropriate interpersonal and communication skills.

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

3.3, Communicate effectively with individuals from diverse populations.

Student Learning Outcome

3.3, Communicate effectively with individuals from diverse populations.

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

5.1, Evaluate and apply contemporary and emerging information including clinical and practice management technology resources.

Student Learning Outcome

1.3, Attainment of competency will be demonstrated using a Case Portfolio evaluated with a modified ABE scoring rubric.

Student Learning Outcome

1.3, Attainment of competency will be demonstrated using a Case Portfolio evaluated with a modified ABE scoring rubric.

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

Student Learning Outcome

5.1, Evaluate and apply contemporary and emerging information including clinical and practice management technology resources.

Student Learning Outcome

5.2, Evaluate and manage current models of oral health care management and delivery.

Student Learning Outcome

5.2, Evaluate and manage current models of oral health care management and delivery.

Student Learning Outcome

1.1, Evaluate and integrate emerging trends in health care and the field of endodontology

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

6.8, Utilize universal infection control guidelines for all clinical procedures .

Student Learning Outcome

6.16 Recognize and manage substance abuse.

Student Learning Outcome

6.15, Recognize and manage patient abuse and/or neglect.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

6.1, Manage the endodontic oral health care of the child, adolescent, and adult, as well as the unique needs of the medically compromised and special needs patients.

Student Learning Outcome

3.2, Apply psychosocial and behavioral principles in patient-centered health care.

Student Learning Outcome

3.2, Apply psychosocial and behavioral principles in patient-centered health care.

Student Learning Outcome

4 .3, Recognize and appreciate the need to contribute to the improvement of oral health beyond those served in traditional practice settings.

Student Learning Outcome

5.3, Apply principles of risk management, including informed consent and appropriate record keeping in patient care.

Student Learning Outcome

5.3, Apply principles of risk management, including informed consent and appropriate record keeping in patient care.

Student Learning Outcome

6.14, Prevent, recognize, and manage medical and dental emergencies.

Student Learning Outcome

6.3 Obtain and interpret patient/medical data, including a thorough intraextraoral examination, and use these findings to accurately assess and manage all patients.

Student Learning Outcome

6.3 Obtain and interpret patient/medical data, including a thorough intraextraoral examination, and use these findings to accurately assess and manage all patients.

Student Learning Outcome

6.3 Obtain and interpret patient/medical data, including a thorough intraextraoral examination, and use these findings to accurately assess and manage all patients.

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

2.1, Apply ethical and legal standards in the provision of dental care.

Student Learning Outcome

2.1, Apply ethical and legal standards in the provision of dental care.

Student Learning Outcome

5.5, Demonstrate ability to conduct self-assessment and to use assessment to set performance goals

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

1.4, Apply research principles to answer an original research question

Student Learning Outcome

6.17 Diagnose, identify and manage oral mucosal and osseous diseases.

Student Learning Outcome

6.10, Manage endodontic procedures that preserve tooth structure, maintain function , and promote soft and hard tissue health.

Student Learning Outcome

6.12, Diagnose and manage endodontic surgical treatment needs.

Student Learning Outcome

6.12, Diagnose and manage endodontic surgical treatment needs.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and peri radicular origin.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and peri radicular origin.

Student Learning Outcome

6.12, Diagnose and manage endodontic surgical treatment needs.

Student Learning Outcome

6.10, Manage endodontic procedures that preserve tooth structure, maintain function , and promote soft and hard tissue health.

Student Learning Outcome

6.13, Diagnose and manage endodontic retreatment needs.

Student Learning Outcome

6.10, Manage endodontic procedures that preserve tooth structure, maintain function , and promote soft and hard tissue health.

Student Learning Outcome

6.7, Evaluate outcome of endodontic dental care

Student Learning Outcome

6.7, Evaluate outcome of endodontic dental care

Student Learning Outcome

6.7, Evaluate outcome of endodontic dental care

Student Learning Outcome

5.4, Demonstrate effective business, financial management and human resource skills.

Student Learning Outcome

4.1, Provide prevention, intervention, and educational strategies.

Student Learning Outcome

6.2, Prevent, identify, and manage trauma, oral disease and other disorder of pulpal and peri radicular origin.

Student Learning Outcome

1.2, Utilize critical thinking and problem-solving skills.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

Student Learning Outcome

1.2, Utilize critical thinking and problem-solving skills.

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases.

Student Learning Outcome

1.2, Utilize critical thinking and problem-solving skills.

Student Learning Outcome

6.4, Select, obtain , and interpret diagnostic images for the individual patient.

Student Learning Outcome

6.4, Select, obtain , and interpret diagnostic images for the individual patient.

Student Learning Outcome

6.6, Formulate an endodontic diagnosis, treatment andlor referral plan for the management of patients.

Student Learning Outcome

6.6, Formulate an endodontic diagnosis, treatment andlor referral plan for the management of patients.

Student Learning Outcome

6.9, Prevent, diagnose, and manage pain and anxiety in the dental patient.

Student Learning Outcome

6.9, Prevent, diagnose, and manage pain and anxiety in the dental patient.

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases.

Student Learning Outcome

6.9, Prevent, diagnose, and manage pain and anxiety in the dental patient.

Student Learning Outcome

6.11, Diagnose, identify, and manage pulpal and periradicular diseases.

Student Learning Outcome

6.6, Formulate an endodontic diagnosis, treatment and/or referral plan for the management of patients.

Student Learning Outcome

6.5, Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of endodontic dental care.

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

2.2, Practice within one's scope of competence and consult with or refer to professional colleagues when indicated.

Student Learning Outcome

4.2, Participate with dental team members and other health care professionals in the management and health promotion of all patients.

Student Learning Outcome

3.4 Communicate endodontic skills and endodontic scope of practice effectively to your dental professionals and professional colleagues

Student Learning Outcome

2.2, Practice within one's scope of competence and consult with or refer to professional colleagues when indicated.

Student Learning Outcome

3.4 Communicate endodontic skills and endodontic scope of practice effectively to your dental professionals and professional colleagues

Program: Orthodontics (DCRT-ORTH)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

Demonstrate a broad knowledge of the dental and scientific literature as it relates to orthodontics and dentofacial orthopedics.

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

Correct malocclusion of the teeth and jaws to the standards of the American Board of Orthodontics (ABO) and be able to collect the required patient records and put together case presentations which follow the specific directions of the ABO for their specialty certification clinical examination.

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Initiate and complete a research project and publishable thesis that includes the development of a hypothesis, a critical review of the literature, design methodology, statistical analysis, and interpretation of data.

Student Learning Outcome

Demonstrate a broad knowledge of the dental and scientific literature as it relates to orthodontics and dentofacial orthopedics.

Student Learning Outcome

Diagnose and plan the treatment for different types of malocclusion using evidence-based concepts of growth and development, anatomy, histology, pathology, dental materials, and biomechanics.

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

Correct malocclusion of the teeth and jaws to the standards of the American Board of Orthodontics (ABO) and be able to collect the required patient records and put together case presentations which follow the specific directions of the ABO for their specialty certification clinical examination.

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

Manage and treat all types of malocclusion in either the transitional or the permanent dentition including dentofacial, craniofacial, functional, and temporomandibular problems.

Student Learning Outcome

Demonstrate a broad knowledge of the dental and scientific literature as it relates to orthodontics and dentofacial orthopedics.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Correct malocclusion of the teeth and jaws to the standards of the American Board of Orthodontics (ABO) and be able to collect the required patient records and put together case presentations which follow the specific directions of the ABO for their specialty certification clinical examination.

Student Learning Outcome

Manage and treat all types of malocclusion in either the transitional or the permanent dentition including dentofacial, craniofacial, functional, and temporomandibular problems.

Student Learning Outcome

Recognize and classify dental and skeletal malocclusion into the types and categories accepted by the Council on Dental Education of the American Dental Association.

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

Manage and treat all types of malocclusion in either the transitional or the permanent dentition including dentofacial, craniofacial, functional, and temporomandibular problems.

Program: Orthodontics (DMS-ORTH)

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Initiate and complete a research project and publishable thesis that includes the development of a hypothesis, a critical review of the literature, design methodology, statistical analysis, and interpretation of data.

Student Learning Outcome

Diagnose and plan the treatment for different types of malocclusion using evidence-based concepts of growth and development, anatomy, histology, pathology, dental materials, and biomechanics.

Student Learning Outcome

Demonstrate a broad knowledge of the dental and scientific literature as it relates to orthodontics and dentofacial orthopedics.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Recognize and classify dental and skeletal malocclusion into the types and categories accepted by the Council on Dental Education of the American Dental Association.

Student Learning Outcome

Correct malocclusion of the teeth and jaws to the standards of the American Board of Orthodontics (ABO) and be able to collect the required patient records and put together case presentations which follow the specific directions of the ABO for their specialty certification clinical examination.

Student Learning Outcome

Manage and treat all types of malocclusion in either the transitional or the permanent dentition including dentofacial, craniofacial, functional, and temporomandibular problems.

Program: Periodontics (DCRT-PER)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

Program graduates will demonstrate active listening, oral and written communication skills

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

Students provide periodontal therapy for a diverse population of patients during their educational program

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Program graduates will be able to conduct research .

Student Learning Outcome

Graduates of the Program will be prepared to seek and successfully achieve status as Diplomates of the American Board of Periodontology

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

Graduates of the Program will demonstrate a range of experiences in the full scope of comprehensive periodontal therapy to a patient population with diverse needs.

Student Learning Outcome

The Program will demonstrate that patients receive quality care.

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

Students participate in teaching activities during their educational program with honesty and integrity.

Student Learning Outcome

Students will participate as active members of professional periodontal organizations.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Graduates of the Program will be able to apply foundational knowledge in the biomedical sciences and periodontology to establish a periodontal diagnosis, prognosis, and treatment plan.

Student Learning Outcome

Graduates of the Program will meet the CODA Standards for Advanced Specialty Programs in Periodontics in patient pain and anxiety management.

Student Learning Outcome

Graduates of the Program will be able to apply foundational knowledge in the biomedical sciences and periodontology to establish a periodontal diagnosis, prognosis, and treatment plan.

Student Learning Outcome

Graduates of the Program will be able to apply foundational knowledge in the biomedical sciences and periodontology to establish a periodontal diagnosis, prognosis, and treatment plan.

Student Learning Outcome

Graduates of the Program will understand that they have received a comprehensive education that has prepared them to enter the field of Periodontics and pursue life-long learning.

Student Learning Outcome

Graduates of the Program will meet the CODA Standards for Advanced Specialty Programs in Periodontics in patient pain and anxiety management.

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

Graduates of the Program will demonstrate collaborative care with colleagues to optimize patient outcomes.

Program: Periodontics (DMS-PER)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

Program graduates will demonstrate active listening, oral and written communication skills

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

Students provide periodontal therapy for a diverse population of patients during their educational program

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Graduates of the Program will be prepared to seek and successfully achieve status as Diplomates of the American Board of Periodontology

Student Learning Outcome

Program graduates will be able to conduct research .

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

Graduates of the Program will demonstrate a range of experiences in the full scope of comprehensive periodontal therapy to a patient population with diverse needs.

Student Learning Outcome

The Program will demonstrate that patients receive quality care.

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

Students participate in teaching activities during their educational program with honesty and integrity.

Student Learning Outcome

Students will participate as active members of professional periodontal organizations.

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Graduates of the Program will understand that they have received a comprehensive education that has prepared them to enter the field of Periodontics and pursue life-long learning.

Student Learning Outcome

Graduates of the Program will be able to apply foundational knowledge in the biomedical sciences and periodontology to establish a periodontal diagnosis, prognosis, and treatment plan.

Student Learning Outcome

Graduates of the Program will be able to apply foundational knowledge in the biomedical sciences and periodontology to establish a periodontal diagnosis, prognosis, and treatment plan.
