

Medicine (MD-MD)

Program: Medicine (MD-MD)

OHSU Graduation Core Competency: Communication

Communicate effectively and equitably with diverse individuals, organizations, and communities to support stakeholder decision-making and promote culturally responsive exchanges of information.

Student Learning Outcome

Communicate effectively with patients, families and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds. (ICS1)

Student Learning Outcome

Effectively access, review, and contribute to the electronic health record for patient care and other clinical activities. (ICS5)

Student Learning Outcome

Effectively communicate with colleagues, other health professionals, and health related agencies in a responsive and responsible manner that supports the maintenance of health and the treatment of disease in individual patients and populations. (ICS6)

Student Learning Outcome

Effectively communicate patient handoffs during transitions of care between providers or settings, and maintain continuity through follow-up on patient progress and outcomes. (ICS 7)

Student Learning Outcome

Act in a consultative role, including participation in the provision of clinical care remotely via telemedicine or other technology. (ICS 8)

Student Learning Outcome

Demonstrate insight and understanding about pain, emotions and human responses to disease states that allow one to develop rapport and manage interpersonal interactions. (ICS 3)

Student Learning Outcome

Use health information exchanges (e.g., Care Everywhere within the EPIC electronic health record) to identify and access patient information across clinical settings. (ICS4)

Student Learning Outcome

Counsel, educate and empower patients and their families to participate in their care and improve their health; enable shared decision-making; and engage patients through personal health records and patient health information access systems. (ICS2)

OHSU Graduation Core Competency: Community Engagement, Social Justice and Equity

Apply principles of social justice, equity, and/or anti-racism through community-engaged practice, service, or scholarship.

Student Learning Outcome

Incorporate considerations of resource allocation, cost awareness and risk-benefit analysis in patient and population-centered care (SBPIC 2)

Student Learning Outcome

Apply personalized healthcare services to patients, families, and communities aimed at preventing health problems and maintaining health.(PCP 5)

Student Learning Outcome

Apply principles of social-behavioral sciences to assess the impact of psychosocial and cultural influences on health, disease, care-seeking, care-adherence, barriers to and attitudes toward care. (MK4)

OHSU Graduation Core Competency: Information Literacy

Recognize the power of information in educating, influencing, and understanding the world, while seeking and amplifying missing perspectives. With this lens, locate, critically evaluate, and effectively use information to participate in decision-making, quality improvement, and broader scholarly discourse.

Student Learning Outcome

Analyze practice data using quality measurement tools and adjust clinical performance with the goal of improving patient outcomes and reducing errors. (PBLI6)

Student Learning Outcome

Apply principles of performance improvement, systems science, and science of health care delivery to the care of patients and populations.(MK 5)

Student Learning Outcome

Participate in scholarly activity thereby contributing to the creation, dissemination, application, and translation of new healthcare knowledge and practices. (PLBI7)

Student Learning Outcome

Apply principles of epidemiological sciences to the identification of health risk factors, prevention and treatment strategies, use of healthcare resources, and health promotion efforts for patients and populations. (MK3)

Student Learning Outcome

Participate in identifying system errors and implementing system solutions to improve patient safety. (SBPIC1)

Student Learning Outcome

Use information technology to search, identify, and apply knowledge-based information to healthcare for patients and populations. (PBLI4)

OHSU Graduation Core Competency: Patient Centered Care

Clinical degree program graduates will collaborate with diverse individuals, families, and communities to provide quality trauma-informed care that is anti-racist and respectful of and responsive to preferences, needs, attitudes, beliefs, and values.

Student Learning Outcome

Demonstrate accountability to patients, society and the profession by fully engaging in patient care activities, and maintaining a sense of duty in the professional role of a physician. (SBPIC 3)

Student Learning Outcome

Demonstrate responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disability, socioeconomic status, and sexual orientation (PPPD1)

Student Learning Outcome

Demonstrate sensitivity, honesty, and compassion in difficult conversations about issues such as death, end-of-life issues, adverse events, bad news, disclosure of errors, and other sensitive topics. (PPPD4)

OHSU Graduation Core Competency: Professional Identity and Ethical Behavior

Demonstrate discipline-specific behaviors, norms, and ethics while also recognizing and challenging racist professional expectations which can cause undue burden and/or deny the full humanity of ourselves, our peers, and our patients.

Student Learning Outcome

Demonstrate awareness of one's knowledge, skills, and emotional limitations and demonstrate healthy coping mechanisms and appropriate help-seeking behaviors.(PPPD7)

Student Learning Outcome

Demonstrate skills necessary to support independent lifelong learning and ongoing professional development by identifying one's own strengths, deficiencies, and limits in knowledge and expertise, set learning and improvement goals, and perform learning activities that address gaps in knowledge, skills or attitudes. (PBL11)

Student Learning Outcome

Demonstrate respect for protected health information and safeguard patient privacy, security, and autonomy.(PPPD2)

Student Learning Outcome

Demonstrate a commitment to ethical principles pertaining to provision, withholding or withdrawal of care, confidentiality, informed consent, and business practices, including conflicts of interest, compliance with relevant laws, policies, and regulations (PPPD3)

Student Learning Outcome

Demonstrate responsiveness to patient needs that supersedes self-interest by mitigating conflict between personal and professional responsibilities. (PPPD6)

Student Learning Outcome

Demonstrate integrity, establish oneself as a role model, and recognize and respond appropriately to unprofessional behavior or distress in professional colleagues. (PPPD8)

Student Learning Outcome

Demonstrate accountability by completing academic and patient care responsibilities in a comprehensive and timely manner. (PPPD9)

Student Learning Outcome

Recognize that ambiguity and uncertainty are part of clinical care and respond by demonstrating flexibility and an ability to modify ones behavior. (PPPD11)

Student Learning Outcome

Demonstrate trustworthiness that engenders trust in colleagues, patients, and society at large. (PPPD10)

Student Learning Outcome

Adhere to professional standards when using information technology tools and electronic/social media.(PPPD5)

OHSU Graduation Core Competency: Professional Knowledge and Skills

Demonstrate core knowledge, skills, and practices as defined by the discipline, professional licensing, or accreditation organization while being open to new perspectives, additional voices, and changes in schools of thought that impact the core knowledge, skills, and practices in the discipline.

Student Learning Outcome

Use clinical decision support tools to improve the care of patients and populations. (PBLI3)

Student Learning Outcome

Perform all medical, diagnostic, and surgical procedures considered essential for the specific clinical practice context. (PCP 6)

Student Learning Outcome

Apply established and emerging bio-medical scientific principles fundamental to the healthcare of patients and populations. (MK1)

Student Learning Outcome

Apply established and emerging knowledge and principles of clinical sciences to diagnostic and therapeutic decision-making, clinical problem-solving and other aspects of evidence-based healthcare.(MK2)

Student Learning Outcome

Gather essential and accurate information about patients and their conditions through history taking, physical examination, review of prior data and health records, laboratory data, imaging and other tests. (PCP1)

Student Learning Outcome

Interpret and critically evaluate historical information, physical examination findings, laboratory data, imaging studies, and other tests required for health screening and diagnosis. (PCP2)

Student Learning Outcome

Construct a prioritized differential diagnosis and make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment. (PCP3)

Student Learning Outcome

Continually identify, analyze, and implement new knowledge, guidelines, practice standards, technologies, products, and services that have been demonstrated to improve outcomes. (PBL15)

Student Learning Outcome

Develop, implement, and revise as indicated, patient management plans. (PCP 4)

OHSU Graduation Core Competency: Teamwork

Work effectively within collaborative, team- or teaming-based interprofessional environments while acknowledging positionality and intentionally making space for diverse perspectives.

Student Learning Outcome

Effectively work with other healthcare professionals as a member of an interprofessional team to provide patient care and population health management approaches that are coordinated, safe, timely, efficient, effective, and equitable.

Student Learning Outcome

Effectively work with other healthcare professionals to establish and maintain a climate of mutual respect, dignity, diversity, integrity, honesty, and trust (SBPIC4)

Student Learning Outcome

Effectively work with other healthcare professionals as a member of an interprofessional team to provide patient care and population health management approaches that are coordinated, safe, timely, efficient, effective, and equitable. (SBPIC 5)

Student Learning Outcome

Participate in the education of peers and other healthcare professionals, students and trainees. (PBL12)

Student Learning Outcome

Effectively work with other healthcare professionals to establish and maintain a climate of mutual respect, dignity, diversity, integrity, honesty, and trust. (SBPIC 4)
