

IT'S A FAMILY AFFAIR

COVID-19 vaccines

Getting your COVID-19 shot doesn't just keep you safe.

It's also the best way to protect loved ones who can't get the shot themselves.

That's especially true for family members from different generations.

In Oregon, lots of families are now mixed-vaccine households:

Many grandparents have already been vaccinated.

Many parents and young teens are eligible, but do not yet have their shots.

Kids under 12 aren't old enough to get the vaccine.
