

Help us design support for family caregivers for adults with frontotemporal degeneration

Do you care for a family member with FTD?

Researchers want to design an education and support program that addresses the specific needs of family caregivers for those with FTD.

You may be eligible if:

- You care for a family member with FTD, including such as FTD, primary progressive aphasia and progressive supranuclear palsy.
- You have cared for a family member who has recently passed away with FTD
- You have a computer and can participate in an online focus group.

Study participation includes

- Attend one focus group (60-90 minutes)
- Review printed material
- Complete a brief survey

Additional information

- All study activities are done from your home, no travel is needed
- Gift cards up to \$25 may be provided for completing all study activities
