ADULT AMBULATORY INFUSION ORDER
Amphotericin B Liposomal (AMBISOME) Infusion

Weight: ___________ kg  Height: ___________ cm

Allergies: __________________________________________________________

Diagnosis Code: ____________________________________________________

Treatment Start Date: ___________  Patient to follow up with provider on date: ___________

**This plan will expire after 365 days at which time a new order will need to be placed**

GUIDELINES FOR ORDERING
1. Send FACE SHEET and H&P or most recent chart note.
2. Order culture and sensitivity tests as necessary.
3. Lipid-based and conventional formulations are not interchangeable and have different dosing recommendations. Lipid-based amphotericin formulations (AmBisome) may be confused with conventional formulations (desoxycholate [Amphocin, Fungizone]) or with other lipid-based amphotericin formulations (amphotericin B lipid complex [Abelcet], amphotericin B cholesteryl sulfate complex [Amphotec]).

LABS:
- Complete metabolic panel, routine, ONCE, every day
- CBC with differential, routine, ONCE, every day
- Magnesium, PLASMA, routine, ONCE, every day

NURSING ORDERS:
1. TREATMENT PARAMETER – Hold treatment and notify provider if serum creatinine increases by greater than 0.5 mg/dL.
2. Existing intravenous line should be flushed with D5W before and after infusion.
3. HYPOKALEMIA:
   - For potassium level 3.1 to 3.5 mmol/L, administer Potassium Chloride 40 mEq IV or PO.
   - For potassium level less than or equal to 3 mmol/L, administer Potassium Chloride 60 mEq IV.
   - For potassium level less than or equal to 2.5 mmol/L, administer Potassium Chloride 60 mEq IV and contact provider for further instruction.
4. HYPOMAGNESEMIA:
   - For magnesium level of 1.3 to 1.5 mg/dL, administer Magnesium Sulfate 4 g IV.
   - For magnesium level less than or equal to 1.2 mg/dL, administer Magnesium Sulfate 8 g IV.
5. VITAL SIGNS – For initial infusion monitor and record vital signs, tolerance, and presence of infusion-related reactions prior to infusion, then every 30 minutes until infusion is completed. For subsequent infusions monitor vital signs PRN with any symptoms of infusion reaction.
PRE-MEDICATIONS: (Administer 30-60 minutes prior to infusion)

Note to provider: Please select which medications below, if any, you would like the patient to receive prior to treatment by checking the appropriate box(s)

☐ Acetaminophen (TYLENOL) tablet, 650 mg, oral, ONCE, every visit. Administer 30 minutes prior to infusion.

☐ Diphenhydramine (BENADRYL) capsule, 50 mg, oral, ONCE, every visit. Administer 30 minutes prior to infusion. Give either diphenhydramine or loratadine, not both.

☐ Loratadine (CLARITIN) tablet, 10 mg, oral, ONCE AS NEEDED, every visit, if diphenhydramine is not given. Administer 30 minutes prior to infusion. Give either loratadine or diphenhydramine, not both.

MEDICATIONS:

- Prehydration: sodium chloride (NS) 0.9%, 500 mL, intravenous, ONCE, every visit, over 60 minutes, Administer prior to amphotericin B LIPOSOME infusion.

- Amphotericin B LIPOSOME (AMBISOME) _____ mg/kg = _______ in dextrose 5% (diluted to final concentration: 1mg/mL) , intravenous, ONCE, over 2 hours

Interval: (must check one)

☐ Daily x _____ doses

☐ Other: __________

- Posthydration: sodium chloride (NS) 0.9%, 500 mL, intravenous, ONCE, every visit, over 60 minutes, Administer following amphotericin B LIPOSOME infusion.

AS NEEDED MEDICATIONS:

1. Acetaminophen (TYLENOL) tablet, 650 mg, oral, EVERY 4 HOURS AS NEEDED for infusion related fever.

2. Diphenhydramine (BENADRYL) capsule, 25 mg, oral, EVERY 4 HOURS AS NEEDED for itching.

3. Meperidine (DEMEROL) injection, 12.5 mg, intravenous, EVERY 10 MINUTES AS NEEDED for infusion related rigors in the absence of hypotension, not to exceed 50 mg/hr.

4. Potassium chloride ER (Klor Con M) 40 mEq tablet, by mouth, ONCE AS NEEDED for K 3.1 to 3.5 mmol/L.

5. Potassium chloride 40 mEq in 0.9% sodium chloride 500 mL, intravenous, ONCE AS NEEDED for K 3.1 to 3.5 mmol/L via PERIPHERAL LINE and unable to tolerate oral potassium, over 4 hours.

6. Potassium chloride 20 mEq in sterile water for injection, 100 mL, intravenous, ONCE EVERY 2 HOURS AS NEEDED for K 3.1 to 3.5 mmol/L via CENTRAL LINE and unable to tolerate oral potassium, x2 doses for a total dose of 40 mEq, over 2 hours each for a total infusion time of 4 hours.

7. Potassium chloride 20 mEq in 0.9% sodium chloride, 250 mL, intravenous, ONCE EVERY 2 HOURS AS NEEDED for K less than or equal to 3 mmol/L via PERIPHERAL LINE, x3 doses for a total dose of 60 mEq, over 2 hours each for a total infusion time of 6 hours.
8. Potassium chloride 20 mEq in sterile water for injection, 100 mL, intravenous, ONCE EVERY 2 HOURS AS NEEDED for K less than or equal to 3 mmol/L via CENTRAL LINE, x3 doses for a total dose of 60 mEq, over 2 hours each for a total infusion time of 6 hours

9. Magnesium sulfate 4 g in sterile water for injection, 100 mL, intravenous, ONCE AS NEEDED for Mag 1.3 to 1.5 mg/dL, over 2 hours

10. Magnesium sulfate 4 g in sterile water for injection, 100 mL, intravenous, ONCE EVERY 2 HOURS AS NEEDED for level less than or equal to 1.2 mg/dL, x2 doses for a total dose of 8 g, over 2 hours each for a total infusion time of 4 hours

HYPERSENSITIVITY MEDICATIONS:
1. NURSING COMMUNICATION – If hypersensitivity or infusion reactions develop, temporarily hold the infusion and notify provider immediately. Administer emergency medications per the Treatment Algorithm for Acute Infusion Reaction (Policy HC-PAT-133-GUD). Refer to algorithm for symptom monitoring and continuously assess as grade of severity may progress.
2. diphendramINE (BENADRYL) injection, 25-50 mg, intravenous, AS NEEDED x1 dose for hypersensitivity reaction
3. EPINEPHrine HCl (ADRENALIN) injection, 0.3 mg, intramuscular, AS NEEDED x1 dose for hypersensitivity reaction
4. hydrocortisone sodium succinate (SOLU-CORTEF) injection, 100 mg, intravenous, AS NEEDED x 1 dose for hypersensitivity reaction
5. famotidine (PEPCID) injection, 20 mg, intravenous, AS NEEDED x1 dose for hypersensitivity reaction

By signing below, I represent the following:

I am responsible for the care of the patient (who is identified at the top of this form);
I hold an active, unrestricted license to practice medicine in: □ Oregon □ __________________ (check box that corresponds with state where you provide care to patient and where you are currently licensed. Specify state if not Oregon);
My physician license Number is # ____________________ (MUST BE COMPLETED TO BE A VALID PRESCRIPTION); and I am acting within my scope of practice and authorized by law to order Infusion of the medication described above for the patient identified on this form.
