

Vaccine Redistribution Hubs in Oregon

Providers who want assistance connecting with their Hub should respond to the Oregon Health Authority (OHA) weekly statewide COVID-19 vaccine survey or contact COVID-19 Vaccine Operations at the OHA: COVID19.VaccineRequest@dhsaha.state.or.us

Hub Operator	Counties in Service Area	Ordering Process	Vaccines Available
Grande Ronde Hospital	Morrow, Umatilla, Union, Wallowa, Baker, Malheur	Direct from Hub	Pfizer, Moderna, Johnson & Johnson (J&J)
Sky Lakes Medical Center	Klamath, Lake	Via OHA survey	Pfizer, Moderna, J&J
Douglas County Public Health Network	Douglas, Coos, Curry	Direct from Hub	Pfizer, Moderna, J&J
Hood River County Health Department	Hood River, Wasco, Sherman, Gilliam, Wheeler	Direct from Hub	Pfizer, Moderna, J&J
Josephine Public Health	Josephine	Direct from Hub	Pfizer, Moderna, J&J
Adventist Hospital Tillamook	Tillamook, Clatsop	Via OHA survey	Pfizer, Moderna
Samaritan Health Services	Linn-Benton-Lincoln	Via OHA survey	Pfizer, Moderna, J&J
Salem Hospital	Marion-Polk	Direct from Hub	Pfizer, Moderna, J&J
St. Charles Health System	Deschutes, Crook, Jefferson, Harney, Grant	Via OHA survey	Pfizer, Moderna, J&J
Yamhill Public Health	Yamhill	Direct from Hub	Pfizer, Moderna, J&J
All4Oregon Depot (Contractor is Legacy)	Clackamas, Columbia, Multnomah, Washington	Via OHA survey	Pfizer, Moderna, J&J
Asante Health Systems	Jackson	Via OHA survey	Pfizer
PeaceHealth Sacred Heart Riverbend	Lane	Via OHA survey	Pfizer

Background

OHA has identified thirteen Vaccine Redistribution Hubs for COVID-19 vaccine across the state, to widen vaccine access and prevent waste. All provide the Pfizer vaccine, with most of the Hubs providing other COVID-19 vaccines as well.

Each Hub serves as a central site to receive vaccines, store them for brief periods of time, repackage them into smaller batches, and redistribute them to clinics and other administering sites. Hubs will allow vaccinators such as clinics, pharmacies, and public health sites to have smaller quantities of the [Pfizer vaccine](#) available in their conventional vaccine freezers and refrigerators, where they may be safely stored for up to 6 weeks. In addition, many Hubs are distributing Moderna and J&J vaccine, allowing providers to access small or large quantities of these vaccines that are already on hand in the state.

Hubs provide COVID-19 vaccine to each region's enrolled pandemic vaccine providers, the "Spokes." The ordering process is summarized in the table above. OHA is covering the operating costs of any Hubs that request reimbursement, so there is no cost to the Spokes for this service, and OHA has produced a Fact Sheet for each Hub that provides detail about its ordering and delivery process. You may request the Fact Sheet for your region's Hub by emailing COVID19.VaccineRequest@dhsoha.state.or.us.

Note for sites deciding how much of the Pfizer vaccine to order: As of May 19, 2021, the FDA has authorized Pfizer vaccine to be stored for up to 2 weeks in a conventional vaccine freezer (-25 to -15C) plus up to one month in a vaccine refrigerator (2 to 8C). This means that facilities without an ultra-cold freezer can safely store the Pfizer vaccine on site for up to 45 days.

Note about Johnson & Johnson vaccine supply: While J&J is not available from the manufacturer as of July 2021, sites can obtain it by responding to the OHA's statewide vaccine request survey. Sites that are served by a Hub that handles J&J will receive the vaccine via delivery from the Hub. For other jurisdictions, the OHA will ship J&J directly to the enrolled vaccinator.

Document accessibility: For individuals with disabilities or individuals who speak a language other than English, OHA can provide information in alternate formats such as translations, large print, or braille. Contact the Health Information Center at 1-971-673-2411, 711 TTY or COVID19.LanguageAccess@dhsoha.state.or.us
