**Date:** \_\_\_\_\_

**IMPORTANT NOTE RE: THE GLOBAL CORONAVIRUS PANDEMIC**

It is our hope/desire/intention to offer these training opportunities to successful applicants ***in person on our campus in Beaverton, Oregon***. However, our ability to do this will be dependent upon the state of the global pandemic. If we are unable to host these projects in person, they will be offered virtually. The decision about whether projects will be hosted in person or virtually will be made by April 15, 2022.

Research that takes place at the Oregon National Primate Research Center/OHSU is undertaken to improve understanding of human health and disease. Animal models are essential in this pursuit, and students need to be aware that in certain cases invasive animal procedures are necessary. Ethical issues associated with research in humans and other animals can evoke strong controversy, yet animal research is presently our only means of answering certain critical questions that we hope will lead to improved therapies and/or cures for disease. Federal law mandates adherence to regulations that ensure our research procedures are both humane and justified in terms of their contribution to knowledge and medical practice.

I understand that animal research takes place at the Oregon National Primate Research Center. I support the ethical conduct of animal research that is carried out in compliance with federal laws and regulations.
