THE CDCB SUMMER INTERNSHIP OFFERS:
- Direct hands-on experience in running basic lab techniques.
- An introduction to experimental design and critical thinking.
- Participation in a guided project facilitated by a departmental researcher.
- Development of written and oral communication skills.
- Various networking opportunities with a community of scientists.
- Both wet and dry lab experiences are available.
- Weekly stipend of $500, up to 12 weeks.
- Housing and airfare support are available.

ELIGIBILITY:
We are looking for motivated college undergraduates with an interest in a career in biomedical sciences. Students must be available and participate for the duration of the internship—the expected commitment is 40 hours per week.

DATES:
Our internship program begins in early June and runs through early August. A later start date is available for those unable to start in early June.

LOCATIONS:
Interns work in the Department of Cell, Developmental & Cancer Biology and Knight Cancer Institute Laboratories at the OHSU Marquam Hill and South Waterfront campuses in Portland, OR.

WHERE CAN I APPLY?
View departmental research and find the program application at www.ohsu.edu/cdcb. Applications generally open in January and are due by mid-February.
