# Working Together

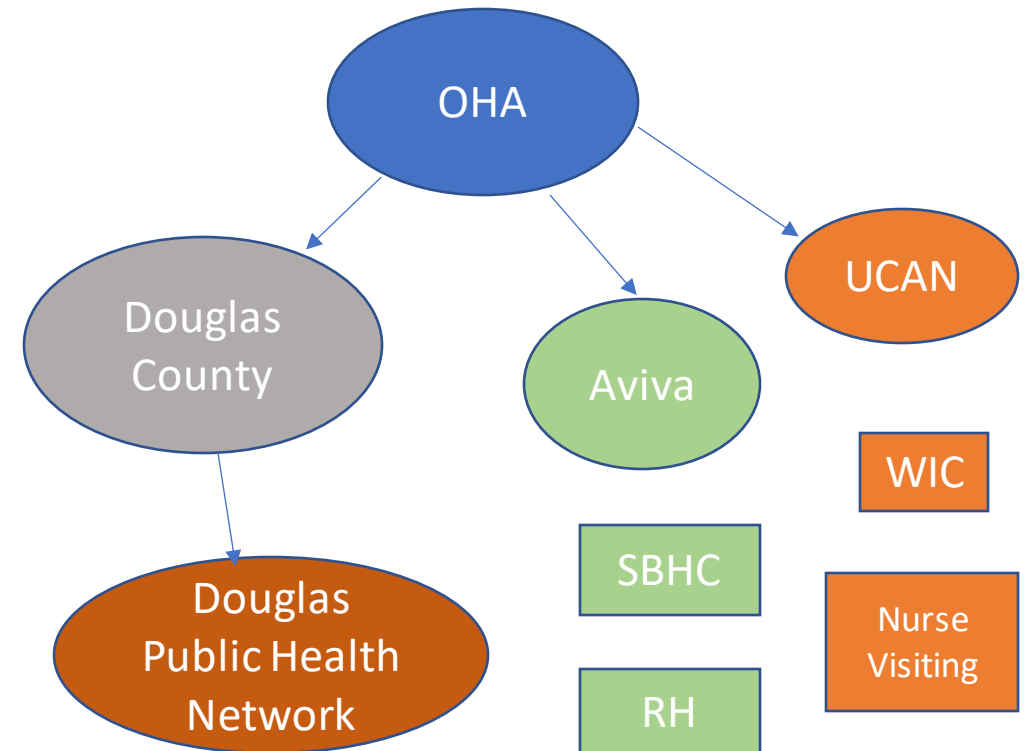

# Desire

# Structure

- Public Health in DC is a private public partnership
- County retains the public health authority and employs the health officer
- Encourages state to contract directly with local NFP's for WIC and nurse visiting, with FQHC for RH and SBHC
- Contracts clinical services (immunizations, clinical STI) to local FQHC
- Contracts non-clinical services to a local not for profit- DPHN
- Board of the NFP DPHN includes commissioner, CCO reps, hospital reps, other NFP's, FQHC's

# Practice

- Always best not to have to do introductions at the beginning of the pandemic
- Many years of community wide drills and projects to meet and practice

# Continue to work at it

- May seem simpler to do things internally
- Distant screening clinics
- Distributed PPE and tests to offices and clinics
- Distributed vaccines to offices and clinics
- Many briefings to providers and hospitals

## Thank You to All of our Partners!
