The goal of the **Cell, Developmental and Cancer Biology Summer Research Internship at the Knight Cancer Institute** is to inspire scientific curiosity in the next generation of scientists, by engaging qualified college undergraduates to consider basic science research-related careers and providing them with initial experiences required to be competitive for science-related graduate education programs and careers in the future.

**THE CDCB-KCI SUMMER INTERNSHIP OFFERS:**
- Direct hands-on experience in running basic lab techniques.
- An introduction to experimental design and critical thinking.
- Participation in a guided research project facilitated by an experienced researcher.
- Development of written and oral communication skills.
- Networking opportunities within a broad community of scientists.
- Both wet and dry lab experiences are available.
- Weekly stipend of $500, up to 12 weeks.
- Housing and airfare support are available.

**ELIGIBILITY:**
We are looking for motivated college undergraduates with an interest in a career in biomedical sciences. Students must be available and participate for the duration of the internship. The expected commitment is 40 hours per week.

**DATES:**
The CDCB-KCI internship program begins in early June and runs through early August. A later start date is available for those unable to start in early June.

**LOCATIONS:**
Interns work in the Department of Cell, Developmental & Cancer Biology and Knight Cancer Institute Laboratories at the OHSU Marquam Hill and South Waterfront campuses in Portland, OR.

**WHERE TO APPLY?**
View departmental research and find the program application at [www.ohsu.edu/cdcb](http://www.ohsu.edu/cdcb). **Applications will open November 14, 2022 and are due by February 6, 2022.**
