Institutional anti-racism guidebook
A guide for all OHSU members

Institutional Racism are the policies, procedures, and practices that operate within institutions and organizations that disadvantage individuals and groups based on race.
Definitions

Unconscious or implicit bias

A tendency or inclination that results in judgment without question.

Health Disparities

Preventable differences in the burden of disease, injury, violence, or opportunities experienced by socially disadvantaged.

Prejudice

A preconceived opinion or belief about a person or group.

Discrimination

A differential treatment of a person or group based on prejudice.

Racism

A system of inequality in which discrimination on the basis of race is institutionalized.

For expanded definitions and definitions of additional terms, see the Inclusive Language Guide developed by OHSU’s Center for Diversity and Inclusion.
Sociology of Racism

The three I’s: Systems and Power

Definitions

- A system is a collection of interrelated parts or elements that we can think of as a functioning whole.

- Power is the ability to influence the behavior of others or the course of events.

Structural Change
Next steps

- OHSU ends practice of factoring a patient’s race into diagnosis, treatment in kidney disease.
- Speaking Up to Change Culture; OHSU changes language used in medical technology.

Reflection exercises:

- What policies or practices in your unit may be producing or reproducing DEI injustices?
- What are the alternative policies or practices that could be implemented to alleviate these injustices?
- Who, in your unit, is in the position or has the power to change the existing policies and practices?
- What steps can you personally take to get the attention and buy-in of those stakeholders?
