Lead Facilitator

David Clarke, MD serves as the seminar moderator, calling on the expertise of invited colleagues and audience members to explore current ethical dilemmas. Dr. Clarke is President of the Psychophysiologic Disorders Association, an Assistant Director at the Oregon Health & Science University (OHSU) Center for Ethics in Health Care, and Clinical Assistant Professor of Gastroenterology Emeritus at OHSU.

Additionally, Dr. Clarke is Clinical Advisor to the Stress Illness Recovery Practitioners Association (U.K.) and a Clinical Lecturer with Pacific University in Oregon.

Featured Guest

Dr. Steven Bedrick is an Associate Professor in OHSU's Department of Medical Informatics and Clinical Epidemiology. His research focuses on biomedical applications for natural language processing technologies, with particular emphases on speech and language disorders and secondary use of electronic medical record data.

Dr. Bedrick's computational areas of interest include: language model development and evaluation, information retrieval, human-computer interaction, and ethical, legal, and social implications (ELSI) of the use and deployment of automated systems in biomedical contexts.

Seminar Details

Summary: New Artificially Intelligent language generators can respond to prompts and questions in a way that seems almost human. But they can also respond with bias or error. Many new applications for this technology are proposed in healthcare. Should they be? Come to the Daniel Labby Senior Seminar on October 30th and we will test this technology with medical and ethical dilemmas and let you decide whether it offers promise or peril.

The OHSU Center for Ethics in Health Care is proud to sponsor this seminar.

Please contact Dave Hoyt at hoytd@ohsu.edu with questions, and visit The Center's website [HERE](#) for additional events and information.
