Biomedical & Bioinformatics Research Internship and Training Experience at the Knight Cancer Institute

The goal of the Biomedical & Bioinformatics Research Internship and Training Experience (B-BRITE) is to inspire curiosity in the next generation of research scientists by engaging qualified college undergraduates to consider research-related careers and providing them with initial experiences required to be competitive for science-related graduate education programs and careers in the future. Oregon Health & Science University values the benefits of having a diverse scientific workforce. We encourage applications from students identifying with groups historically underrepresented in the sciences, as well as first generation and students from socioeconomically disadvantaged backgrounds.

**B-BRITE OFFERS:**
- An introduction to experimental design and critical thinking.
- Participation in a guided research project facilitated by an experienced researcher.
- Direct hands-on experience in cutting edge biological and quantitative cancer research methods.
- Development of written and oral communication skills.
- Networking opportunities within a broad community of scientists.
- Weekly stipend of $500 for the 8 or 10 week program.
- Limited housing and airfare support is available.

**ELIGIBILITY:**
We are looking for motivated college undergraduates interested in a career in biomedical and data sciences. Students must be available to participate for the duration of the internship. The expected commitment is 40 hours per week.

**DATES:**
B-BRITE tentative start dates are either June 10th, or June 24th.

**LOCATIONS:**
Interns work in the Knight Cancer Institute Laboratories at the Oregon Health & Science University Marquam Hill and South Waterfront campuses in Portland, OR.

**WHERE TO APPLY:**

Applications will open November 10th and are due by 5:00 PST February 1st.
