Belatacept (NULOJIX) Infusion

Weight: ___________ kg  Height: ___________ cm

Allergies: _____________________________________________

Diagnosis Code: _______________________________________

Treatment Start Date: ___________  Patient to follow up with provider on date: _____________

**This plan will expire after 365 days at which time a new order will need to be placed**

GUIDELINES FOR ORDERING

1. Send FACE SHEET and H&P or most recent chart note.
2. A Tuberculin test must have been placed and read as negative prior to initiation of treatment (PPD or QuantiFERON Gold blood test). Please send results with order. If result is indeterminate, a follow up chest X-ray must be performed to rule out TB. Please send results with order.
3. Patient's Epstein - Barr virus (EBV) status must be confirmed as seropositive prior to initiation of therapy.
4. Patients should have regular monitoring for TB and infection. Prophylaxis against bacterial, viral, fungal, and protozoal organisms should be considered. In particular, prophylaxis against CMV and PJP should be considered for first 3 months post-transplant.
5. Belatacept dosing is based on actual body weight at time of transplantation; do not modify weight-based dosing during course of therapy unless change in body weight is greater than 10%. Please record patient's actual body weight at time of transplantation: ________ kg or current dosing-weight (if different): _______ kg.
6. Pharmacist will round dose to nearest increment of 12.5 mg and will modify during order.
7. Please indicate patient's Epstein-Barr Virus (EBV) positivity and date:
   Results positive (date): ____________
8. Belatacept (Nulojix) is subject to a limited distribution program which requires patient registration for procurement. Referring providers must enroll patient and provide program ID for patients to be scheduled.
   Nulojix Distribution Program Enrollment ID: _____________

PRE-SCREENING: (Results must be available prior to initiation of therapy):

- Epstein-Barr virus (EBV) test results (must be included with orders)
- Tuberculin skin test or QuantiFERON Gold blood test results scanned with orders
- Chest X-Ray result scanned with orders if TB test result is indeterminate.

LABS:

- CBC with differential, Routine, ONCE, every _____ (visit)(days)(weeks)(months) – Circle One
- Complete metabolic panel, Routine, ONCE, every _____ (visit)(days)(weeks)(months) – Circle One
- Magnesium (plasma), Routine, ONCE, every _____ (visit)(days)(weeks)(months) – Circle One
- Phosphorous (plasma), Routine, ONCE, every _____ (visit)(days)(weeks)(months) – Circle One
- Urine dipstick W/O Micro, Routine, ONCE, every _____ (visit)(days)(weeks)(months) – Circle One
- Labs already drawn within ________ days – Labs scanned with orders
NURSING ORDERS:
1. TREATMENT PARAMETER – Hold treatment and contact provider if TB test result is positive or if screening has not been performed.
2. TREATMENT PARAMETER – Hold treatment and contact provider Epstein-Barr Virus (EBV) test result is negative, or if screening has not been performed.
3. VITAL SIGNS – Monitor and record vital signs, tolerance, and presence of infusion-related reactions prior to infusion and at the end of infusion.
4. Follow facility policies and/or protocols for vascular access maintenance with appropriate flush solution, declotting (alteplase), and/or dressing changes.

MEDICATIONS:

*belatacept (NULOJIX)* in sodium chloride 0.9%, 100 mL, intravenous, ONCE over 30 minutes

*Pharmacist will round dose to nearest increment of 12.5 mg and will modify during order verification*

**Initial Dose:**
- 10 mg/kg = __________ mg

**Interval: (must check one)**
- Once
- Four doses at 2, 4, 8 and 12 weeks
  (Dates: Week 2 ______, Week 4 ______, Week 8 ______, Week 12 ______)

**Maintenance Doses:**
- 5 mg/kg = ______ mg

**Interval:**
- Every _________ weeks for _________ doses
  (Beginning at week 16 = every 4 weeks, at least 28 days apart)

HYPERSENSITIVITY MEDICATIONS:

1. NURSING COMMUNICATION – If hypersensitivity or infusion reactions develop, temporarily hold the infusion and notify provider immediately. Administer emergency medications per the Treatment Algorithm for Acute Infusion Reaction (OHSU HC-PAT-133-GUD, HMC C-132). Refer to algorithm for symptom monitoring and continuously assess as grade of severity may progress.
2. diphenhydramINE (BENADRYL) injection, 25-50 mg, intravenous, AS NEEDED x 1 dose for hypersensitivity or infusion reaction
3. EPINEPHrine HCl (ADRENALIN) injection, 0.3 mg, intramuscular, AS NEEDED x 1 dose for hypersensitivity or infusion reaction
4. hydrocortisone sodium succinate (SOLU-CORTEF) injection, 100 mg, intravenous, AS NEEDED x 1 dose for hypersensitivity or infusion reaction
5. famotidine (PEPCID) injection, 20 mg, intravenous, AS NEEDED x 1 dose for hypersensitivity or infusion reaction
By signing below, I represent the following:
I am responsible for the care of the patient (who is identified at the top of this form);
I hold an active, unrestricted license to practice medicine in: ☐ Oregon ☐ ___________________________ (check box that corresponds with state where you provide care to patient and where you are currently licensed. Specify state if not Oregon);

My physician license Number is # ___________________________ (MUST BE COMPLETED TO BE A VALID PRESCRIPTION); and I am acting within my scope of practice and authorized by law to order Infusion of the medication described above for the patient identified on this form.
