

# Internal Medicine Residency Program

## Who We Are

### Aim

The OHSU Internal Medicine Residency is committed to the development of exceptional and compassionate physicians from diverse backgrounds through the care of our community, dedication to and advocacy for underserved communities, delivery of high value, evidence-based care, and engagement with scholarship opportunities to foster ongoing intellectual curiosity.

### Mission

OHSU IM training will inspire learners to:

- Develop flexible and adaptable skill sets to navigate a changing healthcare environment
- Empower the pursuit of personal interests
- Be leaders in their communities
- Be proponents of social change with an understanding of equity and justice in healthcare

### A Sense of OHSU

Experience OHSU GME, the wonders of Oregon, and be part of something bigger.

We offer a three-year training program with optional Primary Care and/or Global Health education tracks. Residents rotate at OHSU, the adjacent VA Medical Center, Kaiser (HMO), and various community sites, including Central City Concern. We have 107 residents equally distributed across the PGY 1-3 levels.

The program emphasizes academic excellence throughout training, offering a learning environment that balances the personal and professional needs of our residents.

Residents divide their time among:

- General Medicine ward services
- ICUs
- Electives in R2 & R3 years
- Various ambulatory care experiences, including, but not limited to:
  - Social Medicine rotations
  - Subspecialty consult rotations
  - Emergency Medicine
  - Geriatrics
  - Neurology

The Department of Medicine faculty are strongly committed to resident education, excellence in clinical care, and basic science research.

## 3+1 Scheduling Model

- Every fourth week dedicated to outpatient-focused training consisting of:
  - Primary Care continuity clinics
  - Specialty clinics
  - Ambulatory seminars
- Firm system allows residents to develop team-based, interprofessional practice
- Guaranteed weekend off prior to each clinic week

## Focused Educational Tracks

### Primary Care

- Preceptorship in R2 year
- Two 3-week Primary Care blocks in R3 year
- Annual Primary Care Track workshop

### Global Health Scholars

- I.H.S. experience or local clinic sites in R2 year
- Botswana rotation in R3 year

Residents apply to the Global Health program prior to starting PGY-1 and remain enrolled throughout all three years of training.

## Specialized Curricula

### Teaching Improvement Science

- Focused training in quality improvement and patient safety

### Advocacy Curriculum

- PGY-1 specific curriculum
- PGY-2/3 elective opportunities
