

OHSU Internal Medicine Clinic ("IMC")

IMC description, location, unique features

IMC is located on the main OHSU campus in the Physicians Pavilion. Our clinic is in the highest tier (Tier 5) for the Oregon Health Authority Patient-Centered Primary Care Home Program (PCPCH). The clinic uses the Epic electronic medical record system, which is the same system utilized by the OHSU inpatient services. Our EPIC interface contains quick links to useful decision-aid and information references including UpToDate, VisualDx and Micromedex. While in their ambulatory week, residents spend most of their between-visit time in a shared charting and conference space with a beautiful view of the Willamette River, the OHSU tram, and Mt. Hood.

IMC patient population

This clinic is an inclusive environment in which adults of all ethnicities, gender identities, cultures, national origins, sexual orientations, races, religions and social and educational backgrounds are welcomed to receive care. Thirty percent of the patient population is underinsured.

IMC team-based care

Resident providers in the IMC work on highly functioning clinic teams, and they are supported by a linked core preceptor, medical assistants, clinical support aides, team-based panel coordinators, nurses and nurse care managers, advanced practice providers, behavioral support specialists/social work, on-site physical therapists, and clinical pharmacists. You are supported by a large, dedicated teaching faculty, who are passionate about ambulatory care and who are natural mentors for you while you see patients in clinic or by virtual visits.

IMC clinic and specialty resources

Within the clinic, there is support for medically-specialized patient populations: Geriatric consultation, HIV care, women's health, complex psychiatric consultation, and Hepatitis C treatment, and specialized clinics for medication-assisted treatment for substance use disorders and complex chronic pain. In addition to standard referrals to OHSU specialty clinics, providers can utilize our eConsult program, in which specialists consult, educate and advise the primary provider with rapid turn-around for specific clinical questions.

We hope you will join us here!
