

Conduct your Research with CRISP

Overview: Since 2003, the Clinical Research Investigative Studies Program (CRISP) has supported Principal Investigators (PIs) by facilitating patient enrollment for clinical research studies that aim to enroll patients in the emergency department. Our program utilizes local prehealth/premed students to efficiently screen and enroll Emergency Department (ED) patients, ensuring quality participants at a fraction of the cost of a full-time research assistant.

Here are some examples of specialties that have successfully run studies through CRISP:

- | | | | |
|----------------------|--------------|--------------|-------------------|
| • Emergency Medicine | • Surgery | • Radiology | • Toxicology |
| • Infectious Disease | • Pediatrics | • Psychiatry | • Family Medicine |
| • Intensive Care | • Trauma | • Urology | • Orthopaedics |

Why Use our Services?

1. Access to a Diverse Pool of Emergency Department Participants and Coordinators:

Our program provides you access to a broad and diverse Emergency Department (ED) patient population, ensuring that recruitment can be tailored to the specific needs of each study. In addition, we have a diverse group of interns, which reflects the diversity in our ED patients and can improve study outcomes.ⁱ

We operate 7days/week from 7am-11 pm.

2. Efficient Enrollment Process:

Streamline recruitment and reduce enrollment time while maintaining high-quality data.

3. Compliance and Quality Assurance:

All participants meet study criteria with rigorous monitoring and CITI/IRB-compliant trained staff.

Our program ensures that all participants meet study criteria and adhere to compliance standards, reducing the risk of errors or protocol violations. All enrollment processes are monitored for integrity and regulatory compliance through Robust QA and QI processes.

4. Tailored Support:

Continuous support to handle challenges during recruitment.

5. Flexible Options for Study Types:

Whether clinical trials or observational studies, we customize services to fit your needs.

To Get started:

- **Submit your study details** [here](#) (timeline, and number of participants needed).
- **Consult with CRISP leadership** to determine the best services fit your project and receive a project quote.
- **Our team screens and enrolls participants**, with ongoing compliance audits and regular updates.

Partnering with us is simple. Contact us today to learn more about accelerating your enrollment process and gain access to ED participants. We're committed to supporting the success of your research!
