

Your agency can use the HERO Kids Registry in a community disaster

**HERO Kids** gives EMS and ED providers real-time access to **key health information** for routine emergencies and **reunification during disasters**.

**HERO Kids Registry bridges the information gap** by giving emergency medical providers information about special health considerations as well as multiple emergency contacts.

## Emergency Response Uses

- **Identification**  
Identify children and young adults using registry ID stickers, backpack tags, and printed HERO Kids forms.
- **Reunification**  
Access to multiple emergency contacts.
- **Communication**  
Learn the child's or young adult's spoken language, if they are non-verbal, or use communication devices.
- **Care Management**  
Current medications, conditions, alerts and emergency protocols.
- **Medical Equipment or Technology**  
Understand the power needs of medically required equipment or technology.
