

#	Presenter	Abstract title	
1	Lida Vadakumchery	Identification of predictive and monitoring biomarkers with P2 plasma proteomics in NSCLC patients	
2	Sam Kimmey	Spatial Cell Biology and Drug Development: New Advances in Multiplex Ion Beam Imaging Tissue and Cell Models	
CORES	3	Joshua N. Adkins	Pacific northwest bioMedical Innovation Co-laboratory
	4	B. Park and L. Karstens	Biostatistics Shared Resource
	5	Amy Laird	Biostatistics & Design Program (BDP): a resource for researchers identifying and evaluating potential drug targets
	6	Ronald P. Leon	OHSU Innovates: Supporting the advancement of OHSU research, innovation, and entrepreneurship for the benefit of society
	7	Ashok Reddy	Proteomics Shared Resource
	8	Yongping Zhong	From Subtractive Immunization to Single-Cell Validation: Development of Novel mAb for Flow Cytometry
	9	Amirreza Bitaraf	Sugary super DCs: fucosylation-stimulated anti-melanoma immune responses by dendritic cells
	10	Natasha Black	Modeling drug response in heterogeneous AML patient samples through cell-type specific latent space representations
11	Jacqueline Budrewicz	Targeting cGAS–STING Activity During Early Mammalian Development: Pharmacologic Perturbation Reveals Effects on Embryo Fate	
12	Charles Alfred Dibb	Sensitizing Pancreatic Ductal Adenocarcinoma through YBX1 Inhibition	
13	Carrsyn Haley	Uncovering the role of GBP1 in clear cell renal cell carcinoma	
14	Michael I. Henderson	Light-Activated Antibody Binding Modulation: A Chemical Biology Platform for Precision Cancer Therapeutics	
15	Julia Johnston	Ornithine Decarboxylase as Drug Target Against Pathogenic Leishmania Parasites	
16	Jacob Kreitzer	Examining the effectiveness of AhR ligand combinations as novel therapeutics in triple-negative breast cancer	
17	Isha Marla	A Machine Learning-Optimized Microfluidic Platform for Patient-Specific Drug Delivery in Glioblastoma	
STUDENTS	18	Biruk Mengesha	Novel near-infrared, tissue specific fluorescent probes for visualization of white matter tissue for fluorescent guided surgery.
	19	Elizabeth R. Milner	In vivo pilot study on antinociceptive and sleep-promoting effects of minor cannabinoids in an inflammatory pain model
	20	Bree M. Mohr	Immune-induced ferroptosis vulnerability in lung cancer
	21	Sang Ah (Dorothy) Park	Next-Generation Comparative Transcriptomic Analysis Reveals Ligand-Dependent Regulation of Lipid Metabolism and Inflammatory Pathways in Reginoid-Treated Rat Brains
	22	Sankita Patil	Generating and Validation Double Gene Deletion Mutants in the Polyamine Pathway of the Pathogenic Parasite Leishmania donovani
	23	Shriya Raghavendra	Identification of CYP4Z2P as a Potential Biomarker of Survival in PIK3CA-Mutant Breast Invasive Carcinoma
	24	Ammar Salem	Resonance Energy Transfer–Driven Photothermal Nanoagent Enables Melanoma Ablation Under Low-PowerNear-Infrared Irradiation
	25	Emma Scritchfield	High Throughput, Multidimensional Classification of Autism-Associated Protein Variants for Disease Mechanism and Pharmacological Rescue
	26	Inchara Shree	Pharmacogenomics and Personalized Medicine: Modeling the Impact of CYP2C19 Polymorphisms on Clopidogrel Metabolism Pharmacogenomics and Personalized Medicine: Modeling the Impact of CYP2C19 Polymorphisms on Clopidogrel Metabolism
	27	Ana Paula Mesquita Souza	ENT-1-Targeted Polymersomes to Enhance the Efficacy of Methotrexate in Choriocarcinoma Treatment
	28	Mahnaj Sultana	In silico and in vitro approaches to elucidate the function of a novel dioxygenase from Leishmania

	29	Dharani Thirumalaisamy	Biologically Grounded Latent Representations Enable Patient-Centered Therapeutic Stratification in Acute Myeloid Leukemia
	30	Ruijie Wang	High-Density IL-2 Nanoparticles Enhance CD8+ T Cell Function, Immune Memory, and Checkpoint Response in Breast and Ovarian Tumor Models.
	31	Elias Wisdom	In Vivo Proximity Labeling Of ApoE And Alpha-Synuclein Isoforms To Find Disease-Relevant Protein-Protein Interactions
	32	Yiheng Zhang	Novel small molecule inhibitors of the mitochondrial permeability transition pore (mPTP) block platelet procoagulant activity
POST-DOCTORAL FELLOWS	33	Ibrahim Berk Berkhan	Development of GPR39 Small Molecule Agonists for Vascular Cognitive Impairment and Dementia
	34	Samrat Chakraborty	Multiple Oral Dosing Enables Sustained Nerve Imaging with Nerve-Targeting Fluorophores and Improves Patient Compliance
	35	Karthickraja Duraisamy	MRI-assisted Magnetic Hyperthermia: An Advanced Therapeutic Strategy for Ectopic Pregnancy
	36	Benedikt Grau	Blurring the line between molecular glues and PROTACs: Design of a modular, low molecular weight PIM-1 degrader
	37	Inah Gu	From Bench to Phase 2: Advancing Xanthohumol for Microbiota-Targeted IBD Therapy
	38	Fernanda Lucena	Repurposed small molecules selectively disrupt Streptococcus mutans biofilms by targeting glucosyltransferase-mediated virulence
	39	Guilherme Roncari Rocha	Designing precision peptides to manage Streptococcus mutans population.
	40	Devin Seka, PhD	Characterization of a peroxisomal transporter protein linked to platinum-based drug resistance
	41	Chao Wang	Structurally Engineered Ferrous Metal–Organic Framework for Dual-ROS Chemodynamic Cancer Therapy
	42	Atheir Abbas	Mechanistic Heterogeneity Among TAAR1 Agonists Revealed by Differential Regulation of the Dopamine Transporter
	43	Thierno Madjou Bah	GPR39 Deletion Worsens Cognitive Impairment in Chronic Progressive Carotid Artery Stenosis in an Age-Dependent Manner
	44	Philip Barnette	Fc Effector Function Shapes Antibody-Mediated Protection and Viral Control in SHIV Challenge Studies
	45	Ry Dennis	Drugging the SOX11 and the Core Regulatory Circuitry in Neuroblastoma
	46	Altair Fazio	Targeting CNS HIV Reservoirs in Infancy via Nanocapsule-Mediated Delivery of Broadly Neutralizing Antibodies
	47	Dr. Mark R. Flory	Unbiased, Deep and Rapid Proteomics at Scale with the Seer Proteograph Product Suite: Offered at OHSU by the Knight Protein Target Identification (KPTI) Service Center
	48	Meredith Kelleher	Targeting Upstream Inflammatory Pathways to Prevent Infection-Induced Preterm Birth in a Nonhuman Primate Model
	49	Adam J. Krieg	Developing in vitro and in vivo models of ovarian biology for improved fertility preservation.
	50	Xingliang Liu	Bap1-driven soft tissue sarcomas: Mouse modeling and therapeutic strategies
	51	Youssef Wahib Naguib	Novel synergistic combinations of paclitaxel and fluoroquinolone-derivatives potentiate immunogenic cell death and induce ferroptosis in paclitaxel-resistant colorectal cancer cells: potential efficacy against the emergence of giant polyploid cancer cells (GPCC).
	52	Jose F. Rodriguez Orenge	Targeting Rac/Cdc42 Signaling to Suppress Tumor Growth and Metastatic Progression: Clinical Translation of MBQ-167
	53	Nicholas B. Struntz	Development of Foxp3-Directed Chemical Probes to Overcome Immunotherapy Resistance
	54	Phillip Randolph Torralva	Development of novel treatments for atypical features of synthetic opioid toxicity
	55	Benjamin Tate	Unsupervised learning with MORPHAEUS enhances conventional tissue spatial phenotyping
	56	Arthur A Vandenbark	Genetically Targeted Therapy for Progressive MS
	57	Alison Weiss	Prodromal pathogenesis of CLN7 Batten Disease revealed by multimodal biomarkers in macaques
