Course Director: Atif Zaman, MD, MPH (zamana@ohsu.edu) & John Stull, MD, MPH (stullj@ohsu.edu)
Schedule: Face-to-face 11 sessions: 5:30-7:00pm  (see below for dates)
Assessment Methods: Attendance 10%, Class participation 15%, Community Health Presentation 75%
Grade: Pass/No Pass

Course Description: This course will meet weekly during the Spring quarter in a presentation-discussion style format. It will introduce students to how the community and public health interact with the medical system in addressing treating disease and promoting health. This will be accomplished by using a medical condition, chronic hepatitis C infection, as a model to engage the public health infrastructure and the community to effectively address disease and promote health. Students will also be introduced to ways of identifying and accessing those services in their own work in the form of a class project.

Learning Objectives:
1) Describe the importance of utilizing community resources in patient care and public health interventions.
2) Explain and demonstrate various ways to find community resources.
3) Demonstrate an understanding of how to work effectively with community and public health partners to provide excellent patient-centered community-based health care services.

CLASS SCHEDULE:

1. Tuesday April 3rd: Introduction Session
   Objectives for this session will be to review the requirements of the course and provide introductions. Students will learn what is expected to earn credit.

2. Tuesday April 10th: The Story of Hepatitis C as a Medical Condition
   Speaker: Atif Zaman
   Objectives for this session will be for students will be able to understand the medical impact of hepatitis C infection on health

3. Tuesday April 17th: The Story of Hepatitis C as a Public Health Concern
   Speaker: Ann Thomas
   Objectives for this session will be to understand the public health implications of hepatitis C infection
