

Announcing for the
OHSU research community:

A new service —
**Analyze structures of
small organic molecules
via NMR**

- Identify neurotransmitters, hormones, and most drugs
- Follow reaction progress by analyzing products
- Utilize our state-of-the-art **Bruker Avance 400 MHz** high performance NMR spectrometer
- Run samples at prices below those charged by industry

*To take advantage of this powerful
diagnostic service, contact:*
