Online registration for IFPA 2016 and satellite symposia is now available.

IFPA 2016 Satellite Symposia
"Uteroplacental Pathology and the Human Placenta Project"
Monday, September 12, 2016
8 a.m. - 3 p.m. PDT

Presentations:

Terry Morgan, M.D., Ph.D., Oregon Health & Science University
New insights from uteroplacental blood flow studies

Carolyn Salafia, M.D., M.S., Institute for Basic Research/Placental Analytics
Placental reserve capacity and adaptation

Mana Parast, M.D., Ph.D., University of California, San Diego
Trophoblastic differentiation and placental insufficiency

Debra Heller, M.D., Rutgers-New Jersey Medical School
What's new in morbidly adherent placenta-MAPing it out

Drucilla Roberts, M.D., Massachusetts General Hospital
Placental pathology in gestational diabetes

Perrie O'Tierney-Ginn, Ph.D., Case Western Reserve University
What does the placenta do with lipids?

Philip Katzman, M.D., University of Rochester Medical Center
Chronic inflammatory lesions of the placenta

Linda Ernst, M.D., M.H.S., Northwestern University Feinberg School of Medicine
Hypoxia-induced vascular maldevelopment: Implications for placenta and fetus

Anna Penn, M.D., Ph.D., Children's National Medical Center
Placental function in brain development and damage

Raymond Redline, M.D., Case Western Reserve University
Placental pathology: It is time to get serious
