Getting Started with R and RStudio

Research Forum: Biostatistics, Epidemiology, Research & Design (BERD) Program Seminar

Presented by Jessica Minnier, Ph.D. and Meike Niederhausen, Ph.D.
OHSU-PSU School of Public Health

This workshop will introduce R and RStudio to people with no prior experience. We will start with how to use RStudio to write and execute code and then show basic commands for working with data: loading, viewing, summarizing, simple plotting, manipulating, and saving of data. We will also discuss different types of data structures and how to create a simple dataset within R. The workshop will end with using R packages to expand R's capabilities and also briefly introduce R Markdown for creating high-quality reproducible documents to present your work.

No experience with R is needed. We encourage you to bring a laptop with R and RStudio installed. For help with installation on your laptop, please arrive 30 minutes early.

This is a repeat of an earlier workshop by popular demand. Stay tuned for more in this series on R.

Thursday, March 7, 2019
3 p.m. - 5 p.m.
School of Nursing, room 358
3455 S.W. U.S. Veterans Hosp. Rd.
Portland, OR 97239
