Request for Applications

Oregon Students Learn and Experience Research (OSLER) TL1 program

Register intent to apply: **March 29, 2019**
Application deadline: **April 15, 2019, 5 p.m.**
Expected appointment start date: **July 1 or September 1, 2019**

*Intent to apply is not binding but is meant to facilitate the request of letters of recommendation in a timely manner.*

Visit the website at [www.octri.org/osler](http://www.octri.org/osler) to register your intent to apply.

The OCTRI Education Program is accepting applications from predoctoral students and postdoctoral trainees for a TL1 mentored career development award funded by NIH/NCATS. This TL1 supports training and career development in clinical and translational research for one year with an opportunity to extend to up to 3 years of training for PhD graduate students and postdoctoral fellows. All research proposed for this program must involve either clinical or translational research defined as involving human subjects or populations, or research that has application to human health.

This program is funded from a TL1 grant to the Oregon Clinical and Translational Research Institute (OCTRI) and is similar to an NRSA T32.

**Graduate or professional students and postdoctoral trainees at OHSU, Portland State University, University of Oregon, and Oregon State University are eligible to apply.**

**Expectations**

The OSLER TL1 provides training in clinical and translational research including basic science, behavioral science, social science, and public health. It supports students and fellows engaged in research involving humans or populations, or that have direct relevance to human health, disease, or disability.

**Professional students (MD, DMD, PharmD, DNP)** must enroll in the OHSU Master of Clinical Research degree through the Human Investigations Program ([www.ohsu.edu/hip](http://www.ohsu.edu/hip)) which can be completed in one year while engaged in research full time. For **PhD graduate students**, the TL1 program is intended to complement graduate training and dissertation research. **Postdoctoral fellows** are expected to be engaged in translational research at least 75% of the time.

All trainees are required to participate in education to acquire competencies of clinical and translational research. These include: quantitative science (biostatistics, study design), data management, academic leadership (program management, team science), scientific writing and data presentation, and research proposal development. This may be completed at the student’s...
home institution or in the OHSU Human Investigations Program (HIP). Most courses in the HIP program can be livestreamed to UO and OSU. Coursework to acquire competencies may be spread out over 2 years for PhD students and postdocs.

Graduate students from PSU, OSU and UO may consider spending a year in residence at OHSU in a lab or research group to facilitate extension of their research to include clinical and translational research. This may create a new inter-institutional research alliance or center on an existing collaboration.

See table below for summary of training activities available.

Support

The TL1 award includes the following:

- Annual stipend at the NIH predoctoral career level at $24,816 (in fiscal year 2019). The individual's home department or university may supplement to the approved institutional level.
- Postdoctoral stipend is set by the NIH and is based upon years of training completed.
- Tuition and fee support.
- $4,200 towards major medical, dental insurance and student health service fees (must be for University-sponsored insurance) for predoctoral trainees. $8850 towards medical and dental coverage (through employer-provided choices) for postdoctoral trainees.
- No research support is available.
- Award is for one year but PhD graduate students and postdoctoral trainees may apply for up to 2 additional years of support, contingent upon progress and program participation.

Eligibility

Predoctoral Trainees

- Eligible students must be enrolled in a doctoral program at OHSU, PSU, UO and OSU including PhD, MD, DMD, DNP, or PharmD.
- Students in professional programs (MD, DMD, DNP, PharmD) must take a year-out from their academic curriculum to participate in this research year.
- Students in graduate PhD programs must complete their qualifying exam prior to receiving award.
- Students must be in good academic standing and have the approval of their program to enroll in this TL1 program.
- Trainees must commit full-time effort at the time of appointment.
- Individuals selected to participate must be citizens or non-citizen nationals of the United States, or have been lawfully admitted to the United States for permanent residence and have in their possession an Alien Registration Receipt Certificate (I-151 or I-551) or other legal verification of admission for permanent residence. Individuals on temporary or student visas are not eligible for this program.
• The expected appointment to the OSLER TL1 is 12 months (minimum of 9 months). NIH NRSA guidelines set a limit of 5 years (6 years if dual degree, i.e. MD/PhD) of total support for predoctoral training grant funding. If you have had more than 4 years of funding already, you may not be eligible.

Postdoctoral Trainees

• Eligible trainees must be current postdoctoral trainees or clinical trainees (advanced year residents, fellows) at OHSU, PSU, UO and OSU.
• Trainees must have the approval of their program director or department/division chair to enroll in the TL1 program.
• Trainees must commit full-time effort at the time of appointment. Clinical trainees may spend no more than 25% of FTE in clinical service.
• Individuals selected to participate must be citizens or non-citizen nationals of the United States, or have been lawfully admitted to the United States for permanent residence and have in their possession an Alien Registration Receipt Certificate (I-151 or I-551) or other legal verification of admission for permanent residence. Individuals on temporary or student visas are not eligible for this program.
• All appointed fellows must agree to a service payback obligation for the first 12 months of support. A second year of the award will serve to meet the obligation requirement.
• The minimum appointment to the OSLER TL1 is 12 months. NIH NRSA guidelines set a limit of 3 years of support total for postdoctoral training grant funding. If you have had more than 2 years of funding already, you may not be eligible.

Selection Criteria:

A selection committee composed of representatives from OHSU, PSU, UO and OSU will conduct the selection process and will follow the model of the NIH peer review process for NRSA T32 awards. Selection criteria will focus on the strength and potential of the trainee and the incorporation of clinical and translational science into the trainee’s future career. The application and will be judged on the following criteria:

• Potential of the applicant
• Research plan
• Training plan
• Mentor team
• Career potential

Application deadline: 4/15/2019 (See [www.octri.org/osler](http://www.octri.org/osler) for link to online application)

Applicants should register intent to apply on the online application by 3/29/2019 to provide information to facilitate the request of letters of recommendation. Registering your intent to apply is non-binding but will trigger a request for a letter of recommendation.

A complete application consists of:
1. Current *curriculum vitae* or an NIH biosketch. The following must be included:
   a. Education – include degrees, schools, full years of attendance and graduation dates
   b. Postdoc positions including year started and ended
   c. Relevant work experience
   d. Any honors received
   e. Any prior research funding received
   f. Publications - sorted by categories (manuscripts, abstracts and presentations)

2. Personal statement (1 page or less) summarizing your desire to enter the TL1 program and outlining your short and long-term career goals. Please discuss how you anticipate that clinical and translational research experience and training will impact your career as a scientist or clinician-scientist. What skill development have you identified that will be required for you to achieve your career goals? This is a very important component of your application.

3. A research proposal (2-page maximum excluding references). This must include a title, hypothesis and specific aims, brief background section, design and methods. For predoctoral students, your expected role in the research project must be detailed. The research proposal should be in the student's prose addressing work that he or she will undertake.

4. Proposed coursework in clinical and translational research during the year of the award. If the student plans to complete the Master of Clinical Research degree, state this but individual courses do not need to be listed. List any additional training proposed.

5. Letters of commitment from research mentor(s) are required, including a description of how the mentor and student will interact. The mentor must cite prior experience in research mentoring. The letter should also include how the project will be funded. If more than one mentor, letters from each mentor may be submitted or the letter from the primary mentor may address how secondary mentors will be involved and interact with the student.

6. An NIH biosketch of the faculty mentor.

7. A letter of recommendation from a faculty advisor or other faculty member. This should be the chair of the Dissertation Advisory Committee unless the chair is also a mentor, if relevant. *Note that an invitation will be sent directly to the faculty named requesting submission of this letter.* Please be sure to discuss this opportunity with your letter writer before you submit your letter of intent.

Refer to the OSLER TL1 Program at [www.octri.org/osler](http://www.octri.org/osler) for the online application form to submit all materials. Please be sure that all documents include the applicant’s name in the header. The letter of recommendation will be requested from the program with instructions as to how to submit separately.

Please contact Karen McCracken (mccracke@ohsu.edu, 503-494-3095) with any questions about the application.
### OSLER TL1 Program and Training Objectives
