

Oregon Clinical and Translational Research Institute
Clinical Research Informatics Support Program
RFA release date: October 8, 2018

OCTRI is accepting proposals for compelling opportunities with the potential for high impact. Applicants may request funding for up to \$5,000 for OCTRI's Clinical Research Informatics services. The list of services available through OCTRI Clinical Research Informatics can be found [here](#).

Application deadline: November 7, 2018

This funding is primarily intended to support early or mid-career OHSU faculty members (at least at the rank of assistant professor or equivalent) for studies supported by peer-reviewed science with direct costs of less than \$100,000. Individuals with career development awards are eligible regardless of funding. Funding requests must be in support of peer-reviewed, externally-funded research by the NIH, other major funding agency or national foundations. This funding opportunity may be used for investigator-initiated and patient-oriented research requiring IRB oversight. Studies must have already received IRB approval, or be in process of approval at the time of application. No funds can be awarded until IRB approval is granted.

Application steps:

- 1) You must consult OCTRI Research Navigator (503-418-9790, octri@ohsu.edu) prior to submitting your application to generate a cost estimate for OCTRI services you are requesting. To obtain an estimate, please submit a Resource Request Form to the OCTRI Research Navigator Program prior to submitting your application. Creating a cost estimate may take some time so please plan accordingly.
- 2) Please complete the basic application [here](#)

Funds must be spent for OCTRI services by June 30, 2019; no carry forward is allowed.

Application should include the following items:

- a) Project title
- b) Principal Investigator's information and NIH biosketch
- c) eRA Commons ID
- d) Budget pages from funded awards that detail direct cost support.
- e) Project Information:
 - Description of services requested from OCTRI's Clinical Research Informatics program:
 - Partner funding source(s):
 - Partner funding grant title:
 - Partner funding expiration date:
 - IRB Protocol #:
 - Have you filed an invention disclosure on intellectual property relevant to this

application? (Y/N):

If yes, please enter the Invention Disclosure number or other details:

f) Research plan (1 page max):

Please describe how the requested funding for the specific OCTRI Clinical Research Informatics services will allow the research team to move to the next stage of research success.

- i) Describe plans for the requested funding. Include how these services will have an impact upon your current research as well as long-term goals. Is the Informatics Support funding requested here to support an already planned portion of the original grant/partner funding grant or to fund an expansion/additional analysis?
- ii) Timeline: Provide a timeline for completion of the proposed work in simple, readable form such as a short paragraph or simple diagram. The proposed work must be completed by June 30, 2019. SEP
- iii) Plans for continuation: Identify specific targets for possible extramural grant applications.
- iv) Budget: An itemized budget is required. Please include cost estimate for OCTRI services supplied by OCTRI after submitting a Resource Request Form. If the cost estimate exceeds the \$5000 cap, please describe how you will cover the additional costs to complete this work. SEP

g) Submit in a separate document (if applicable):

- i) Specific aims of the original grant/partner funding application

Please submit application [here](#)

Application deadline: November 7, 2018

This Program may be available in Spring 2019 depending on availability of funding.
