

Oregon Clinical and Translational Research Institute
Participant and Clinical Interactions (PCI) Management Award
Application Deadline: October 1, 2018

OCTRI is accepting proposals for compelling opportunities with the potential for high impact. Applicants may request funding for up to \$20,000 per project for [Clinical and Translational Research Center](#) (CTRC) services. Specifically, nursing services, study coordinator services, bionutrition services, or lab services.

This funding is intended to support early career faculty members from OHSU as well as OCTRI Partners (i.e. University of Oregon, Portland State University, Oregon State University, Pacific Northwest National Labs, The VA Portland Healthcare System) for studies associated with current mentored career development awards. Funding requests for the PCI Award must involve partnering with peer-reviewed, externally-funded research by the NIH (e.g. K award), VA (e.g. CDA), or major national foundations. Applicants should include the name and NIH biosketch of their primary mentor identified in their current mentored career development award. Applicants should also include documentation from the primary mentor confirming their ultimate responsibility for providing research support and supervision for the success of this project.

A key requirement for this award mechanism is that awardees will receive close project management. Projects will be milestone driven and upon successful completion of milestones and delivery of a progress report, projects may be eligible for an additional \$20,000 for a second year of award (pending availability of funds; to be evaluated in FY20).

This funding opportunity must be used for CTRC services. Studies may take place entirely on the CTRC, or in other locations while utilizing CTRC services. Studies must have already received IRB approval, or be in process of approval at the time of application. No funds can be awarded until IRB approval is granted.

Funds must be completely spent for CTRC services by June 30th, aligning with OCTRI's grant project period. Funding and RFA release for future awards is depend on the availability of funds and will be evaluated each year.

Application will include the following items:

- a) Project title
- b) Principal Investigator's information and NIH biosketch
- c) Primary mentor's information, NIH biosketch and documentation confirming their ultimate responsibility for providing research support and supervision for the success of this project
- d) eRA Commons ID
- e) Project Information:
 - Partner/external funding source:
 - Partner/external funding grant title:
 - Partner/external funding award dates:
 - IRB Protocol #:
 - Have you filed an invention disclosure on intellectual property relevant to this application? (Y/N):
 - If yes, please enter the Invention Disclosure number or other details:
- f) Research plan (2-page max):
 - i) Please provide Specific Aims of the original grant that supports this work/submitted to the partnering funding source. Please describe how the requested funding and specific CTRC services will allow the research team to move to the next stage of research success.

- ii) Timeline: Provide a timeline for completion of the proposed work in simple, readable form such as a short paragraph or simple diagram.
- iii) Plans for continuation: Describe plans for how the requested funding will yield ongoing research with independent funding, with the intent to realize impactful long-term goals. Identify specific targets for possible extramural grant applications.
- iv) Budget: An itemized budget is required.
- v) Research plan of your funded career development award

Review and Selection Process:

Only projects that follow federal rules and NIH policies will move to the review stage.

A review panel will be comprised of a multi-disciplinary committee that will provide a rigorous review similar to a NIH study section. Applicants can expect to hear from the committee by November 1, 2018.
