RHC Emergency Preparedness Risk Assessment All- Approach Development Tool

(To be used with the Risk Assessment Tool)

The purpose of this tool is to help identify the types of emergency situations which could occur in your community or in your RHC service area. These situations should then be addressed in your emergency preparedness plans, written policies and employee training materials to comply with 42 CFR §491.12.

Weather-related Emergencies

1.	What types of weather-related emergencies are common to your geographic area? What is the risk based on historic events or current conditions?
	Thunderstorm Tornados Hurricane Flooding Drought Wildfires Snowstorm/Blizzard Other Storms Other (List):
2.	What types of emergency situations could develop because of a weather-related or natural disaster emergency? List all situations that could occur in each type of weather-related or natural disaster emergency.
3.	What actions would your RHC take in each these emergencies? How would you communicate internally and externally? To whom would you communicate? Would you close the RHC, shelter people in place, or evacuate? Would you need to provide emergency medical care to employees, patients or the community at the RHC? Would your providers be needed to provide emergency medical care at another location?
4.	What type of training is needed to prepare your RHC staff for these situations?

Other Community Emergency Situations

- 1. What types of situations could occur in your community or service area? Consider activities or environmental risk factors, for example:
 - a. Industrial accidents (fires, explosions, chemical leaks at plants or manufacturers)
 - b. Agricultural accidents (chemical exposure, trauma)
 - c. Highway accidents (mass trauma, disruption of transportation, spills)
 - d. Waterway accidents
 - e. Chemical or Hazardous Material Spills
 - f. Institutional Disasters (schools, hospitals, nursing facilities, etc.)

i. Emerging Infectious Disease/ Public Health Emergency

- g. Terrorism
 h. Other: (List)
- 2. What types of emergencies would these situations create internally or externally?

3. What actions would your RHC need to take in response to these emergencies? Would air or water quality be compromised? Would you need to provide emergency care to the victims? Would your staff be called on to assist in triage? Would you receive victims at your RHC? Would your RHC providers be asked to provide care elsewhere?

4. What type of staff training is needed to prepare for these emergencies?

Internal Emergencies

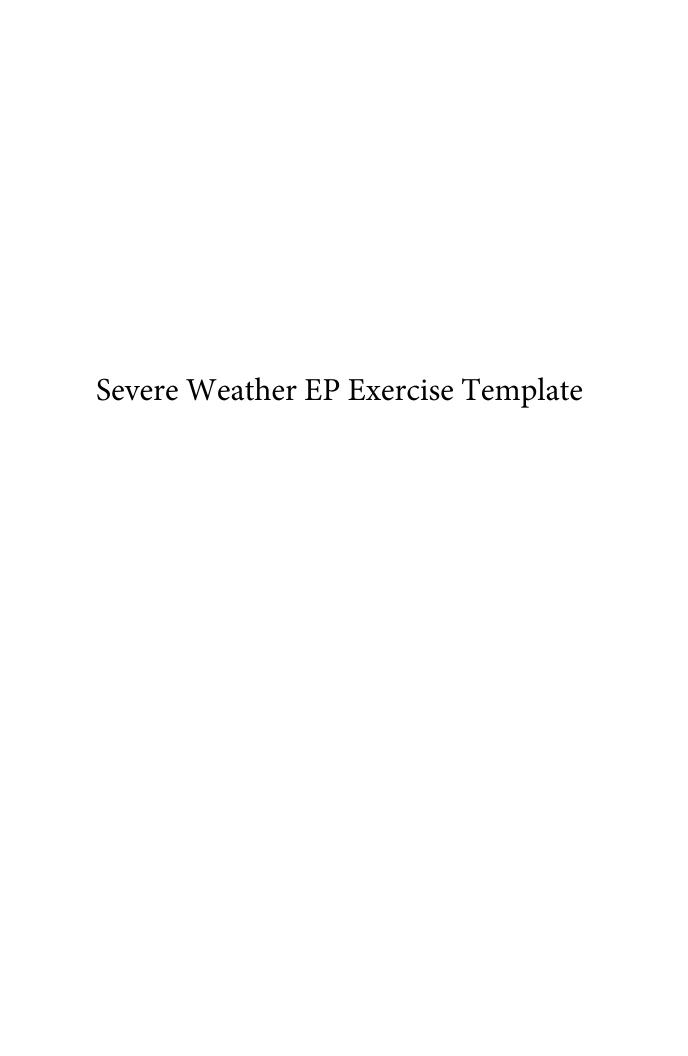

- 1. What types of internal emergencies could happen in your RHC? Some of these will have already been addressed by other written policies such as fire safety, emergency medical care, etc. Consider what other types of emergencies could occur, for example:
 - a. Violent patient or visitor
 - b. Active shooter
 - c. Terrorism against the clinic
 - d. Disruption of public utilities
 - e. Compromised water supply
 - f. Property damage to the RHC
- 2. What kinds of situations could arise in these emergencies?
- 3. What actions would your RHC need to take in response to these emergencies?
- 4. What type of training does your RHC staff need to prepare for these situations?

EMPLOYEE EPP TRAINING CHECKLIST

Employee Name:	
Position/Role:	Hire Date:

✓	Training Description	Date	Supervisor initials
	Employee knows the location of the EPP binder or		
	can access the EPP through InQdocs		
	Employee knows how to access plan on-line		
	or through a software program/common drive		
	Employee knows how to find a specific emergency		
	response plan in the binder		
	Employee knows where fire extinguishers are		
	located		
	Employee knows RACE and PASS acronyms		
	Employee can identify evacuation routes		
	Employee knows where to find the communication		
	tree and understands how to use it		
	Employee knows any code words or code alerts		
	used in emergency situations		
	Employee knows which room(s) can be used as		
	safe rooms for sheltering in place		
	Employee knows where emergency supplies are kept		
	flashlights, batteries, power packs, first aid kits, etc.		
	Employees know what types of alternative		
	communication are available.		
	Employee understands the concept of delegation		
	of authority.		
✓	Testing Participation, as appplicable. Have separate	training logs for	r each exercise, also
	Employee has participated in a		
	community exercise		
	Employee has participated in a facility		
	wide exercise		
	Employee has participated in a tabletop exercise		
	Employee has participated in an in-service training		
	where training from a community wide or facility		
	wide exercise was disseminated to clinic staff		
	Employee has participated in the activation of a		
	real emergency response plan.		
	Employee has participated in a post-event		
	evaluation or after-action report creation.		
	Employee has attended city, county or state		
	workshops or meetings on EPP		

Severe Winter Weather Tabletop or Workshop Exercise Tool

<u>Instructions</u>: Use this tool to conduct a Severe Winter Weather TTX or workshop event. Use the tool to help brainstorm and discuss how severe winter weather could impact your facility. From the discussion, develop and test an emergency response plan for this event. Review your most recent EPP documents to determine if the existing plan requires revision based on the findings of this exercise.

Facility Name:

EPP Response Analyzed at End of Exercise Prepare additional After-Action report or document staff education.

Review the current response actions in the most recently approved EPP. Compare that response to the information discussed and decided during the testing exercise. Based on the exercise, determine if the current response plan for severe winter weather requires any revision or updates.

What needs to be added to the EPP for this hazard or event:				
What needs to be removed or revised in the EPP based on this exercise?				
☐ No Revisions to EPP required based on this exercise.				
Date EPP Reviewed: Date EPP Revised: Date key staff briefed on after action report: Date that providers, employees and staff were retrained on EPP:				
Other Comments:

Provider and Staff Educational Meeting Held:				

Instructions: Conduct a staff training to discuss the details or the exercise. If only one facility representative participated in the tabletop or workshop, you should disseminate the information learned from the exercise and train the staff on the outcomes. Obtain signatures of all providers and staff to document attendance of meeting.

Severe Winter Weather Activation Document and After-Action Report*

<u>Instructions</u>: Use this document to record the emergency condition which required an activation of your EPP. Attach any supporting documentation. For the *After-Action Final Report, you must conduct a staff training to review the activation and to discuss what worked and what didn't. You should also discuss any revisions or changes to the plan from the lessons learned. <u>The report is not complete without a sign-in sheet from the staff meeting held after the emergency situation</u> was resolved.
